Materials: Rustic sawn pine

Finish: The finish is a natural rich brown with dark bronze metal hardware.

Inspiration: On trend casual styling made popular by social media millennials. Simplistic styling that is “rough and tumble” for today’s more casual lifestyle. The inspiration for this collection came from straight forward design that is more about function than embellishments. Also inspired by the trend to repurpose rather than discard and replace.

Number of Pieces: 7

Description: The most simplistic construction was used. Solid, sturdy and practical are all words that define this new collection. There are three distinctive coffee tables in the group. The lift top trunk coffee table provides unique function with trunk storage underneath the partial lift top. The front features shelf storage and it is casters for ease of movement. The 38” Round coffee table features diamond pattern planking on the top and it is casters along with the simple rectangular coffee table. The other interesting items are a charging chairside and an entertainment console with rustic features on the doors like sawn cuts and hex bolts for decoration. Metal “L” brackets were used at the butt joints for added interest and authentic structural stability. The repurposed styling is further enhanced by the use of rustic sawn cut pine.
