Ultralight Beam 2

D2773S55451-4764

The Ultralight Beam series of works on canvas offers a strikingly bold exploration of magnified form, geometric shapes, and the interplay of light and dark rendered on a flat picture plane. Ultralight Beam 2 is a study in contrasts offering a traditional yin and yang philosophy. Here, the interplay of opposing yet complementary universal forces and principles underscores the interconnectedness and interdependence of all things and illustrates how opposites can be harmonious and interconnected. The duality of the work is achieved using sharp angles, an ovoid shape, the application of light and dark tones, and a limited color scheme. A study of bold, imaginative forms, this highly technical work on canvas is an alluring addition to ART by TA.
