

First of all, thank you for choosing products, we will be excellent products and excellent service Thank you for your support and love.

Our main products are: Electric Griddle series, electric fryer, gas combination boiler, Hamburg machine, noodle machine, holding cabinets, fast food equipment, etc.; products are fashionable, energy saving, advanced technology for a variety of hotels Chinese and Western restaurants, bars and so on.

First, the technical parameters

Name	Gas Doner Kebab Machine	Gas Doner Kebab Machine
Model	CG-25Q	CG-22
Fuel	LPG	LPG
Dimensions	320*300*480mm	300*295*440mm

Second, the use of notes:

- 1, the power supply voltage must be consistent with the unit.
 - 2, the use of gas cans, pipe fittings, regulators must be safe and reliable, can not have leakage phenomenon.
 - 3, the burner is strictly prohibited beat and wash with water
 - 4, or a longer period of time after use to leave the device, you must cut off the air (electric) source.
- Third, use:
- 1, according to the baking video, linked to a variety of selected automatically dial in the shaft on the grill the best position, fixed to the shaft on the grill.
 - 2, open the gas valve, burner lit with a point guns pressing shaft motor switch, indicator light, shaft began to turn.
 - 3, the good food of your choice on the string to the bamboo stick on the grill cover to automatically dial, for baking, you can cook the hot side of grill hanging off side, continuous baking.
 - 4, baked goods and food color and length of baking time, according to various

different foods and personal preferences of their choice, then grilled and baked goods from the device.

5, the device uses gas combustion, when the finished baked goods should be air (electric) source cut off, cleaning off (e) air supply, using non-corrosive cleaning solution, wipe with a towel to clean, non-water Washing, not to clean water immersion, or easy to destroy the electrical performance of the machine, prone to accidents with electrical safety and reduce the life of the machine.

Fourth, the general failure of the inspection and exclusion

Fault	Reason	Remedy
Power, pressing the switch, the shaft does not turn	Power is not normal, no power, fuse blown	Check the power supply, replace the fuse, so that normal supply of electricity
Power, pressing the switch, the shaft does not turn	1, the motor switch is damaged 2, the motor burned out 3, sub off shaft Shaw	1, replace the switch 2, replace the motor 3, re-well son Xiao
Open the gas valve, burner, no ventilation	1, liquefied gas bottle not clogging 2, piping and nozzle	1, re-pot gas 2, pipes and nozzles eliminate the debris management
Open the gas valve, adjust the minimum bit value lit burner, the flames appear yellow or larger fire	1, excessive wear of the nozzle hole 2, the regulator is not a good tune	1, replace the nozzle 2, re-adjust the valve

Warranty Card

Product Name		User name or address	
Date of Purchase		Distribution units (Seal)	
Factory code			
<p>The product of "three guarantees", such as failure of the user can not be excluded, may apply to our plant or contact your local service department to resolve the aftermarket repair free of charge within six months.</p> <p>First, the user must fill out the warranty card at time of purchase, sealed by the force distribution unit, after the use of the Card checkmark repair.</p> <p>Second, where do not follow the instructions of the installation, misuse, collision damage, you need to replace parts of the product level, only to recover part of the production costs.</p> <p>Third, by my factory "three guarantees" service, please notify me by letter or telephone plant, and explain the product number, and damage.</p>
