- Step 1:** Find item I. Place the end with the ring on item A (base) with 3 poles from item B (long poles). When place long poles on top of the base, use the screws from item G (screws) to tighten the base (clockwise). Hold the bulb holder or hang aside while installing.
- Step 2:** On the second shelf, repeat Step 1.
- Step 3:** On the third shelf, repeat Step 2.
- Step 4:** When finished assembling with base, find item D (bottom ring). Place ring on top of the lamp. Hold the bulb holder or hang aside while installing.
- Step 5:** Find item C (short poles) and place 3 poles to the top of the lamp. Hold the bulb holder or hang aside while installing.
- Step 6:** Find item J (top ring) and place at the top of the lamp. Use screws from item H to tighten top ring. Hold the bulb holder or hang aside while installing.
- Step 7:** Find item F (lampshade) and place the lampshade into the top portion of the lamp. Uncap the cap from the bulb holder and screw it into the lampshade.
- Step 8:** Adjust the cord starting from the bulb holder. Gently stretch the cord to a desire length toward the bottom of the lamp. Place item E (glass) at its designated area.
- Final:** Install a light bulb and plug cord into an outlet to use the lamp!

SAFETY INSTRUCTION:

This lamp operates with an on/off pull-chain, requiring only a single wattage bulb. Please use a maximum 100-watt standard incandescent light bulb in this lamp, or use an equivalent 23-watt compact fluorescent (CFL) light bulb. Bulbs are not included in this package.

Do not use a 3-way light bulb in this lamp – use of a 3-way bulb with a simple on/off switch could cause bulb failure resulting in smoke or fire damage to the lamp and/or surroundings. Do not use a halogen light bulb with this lamp - these light bulbs reach high temperatures and failure of the bulb may cause smoke or fire damage to the lamp and/or surroundings.

Caution: load max weight 6 pounds per shelf
