

Installation & Assembly

As this item contains many parts, please read the installation instruction carefully before installation . Please use tools properly and carefully.

Before You Start

- ✓ Read through each step carefully and follow the proper order
- ✓ Separate and count all your parts and hardware
- ✓ Give yourself enough room for the assembly process
- ✓ Have the following tools: Flat Head Screwdriver, #2 Phillips Head Screwdriver and Hammer
- ✓ Caution: If using a power drill or power screwdriver for screwing, please be aware of to slow down and stop when screw is tight. (Assembly speed can be increased by using electric screwdriver)

Helpful Hints

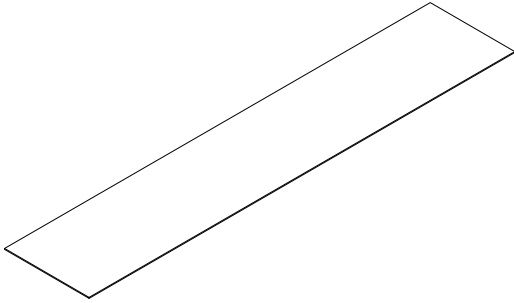

PEOPLE NEEDED FOR ASSEMBLY: 1-2

- Open your item in the area you plan to keep it to avoid excessive heavy lifting.
- Identify, sort and count the parts before attempting assembly.
- Compression dowels are lightly tapped in with a hammer.
- Slides are labeled with an **R** (right) and **L** (left) for proper placement.
- Make sure to always face the point on the top of the Cam Lock towards the outer edge.
- If there is a back panel in the package, please install it to make sure your unit is complete and sturdy.
- Please fix all the screws provided for the back panel which can enhance product stability. If it is difficult to fix it when tightening, it can be fixed with the help of a hammer and then tightened.
- Do NOT use harsh chemicals or abrasive cleaners on this item.
- Never push, pull, or drag your furniture.

SCHEMATIC DIAGRAM OF HINGE ADJUSTMENT DOOR PANEL GAP

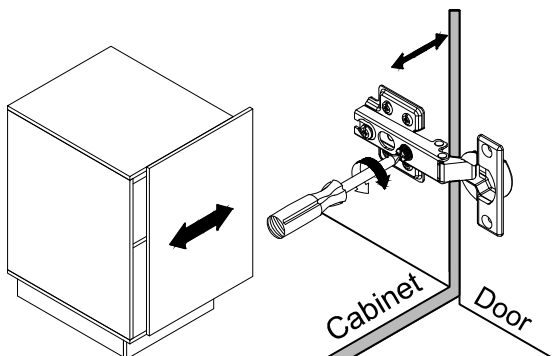

To adjust the vertical height.

Loosen the four screws "A" on both hinges. Two of them are usually in slotted holes which allows you to adjust up or down by a few mm. Then tighten back up.

To adjust depth.

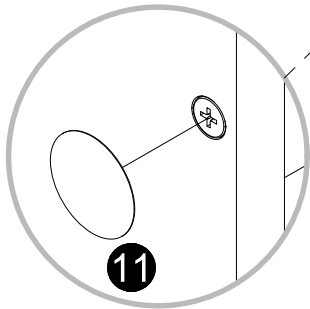

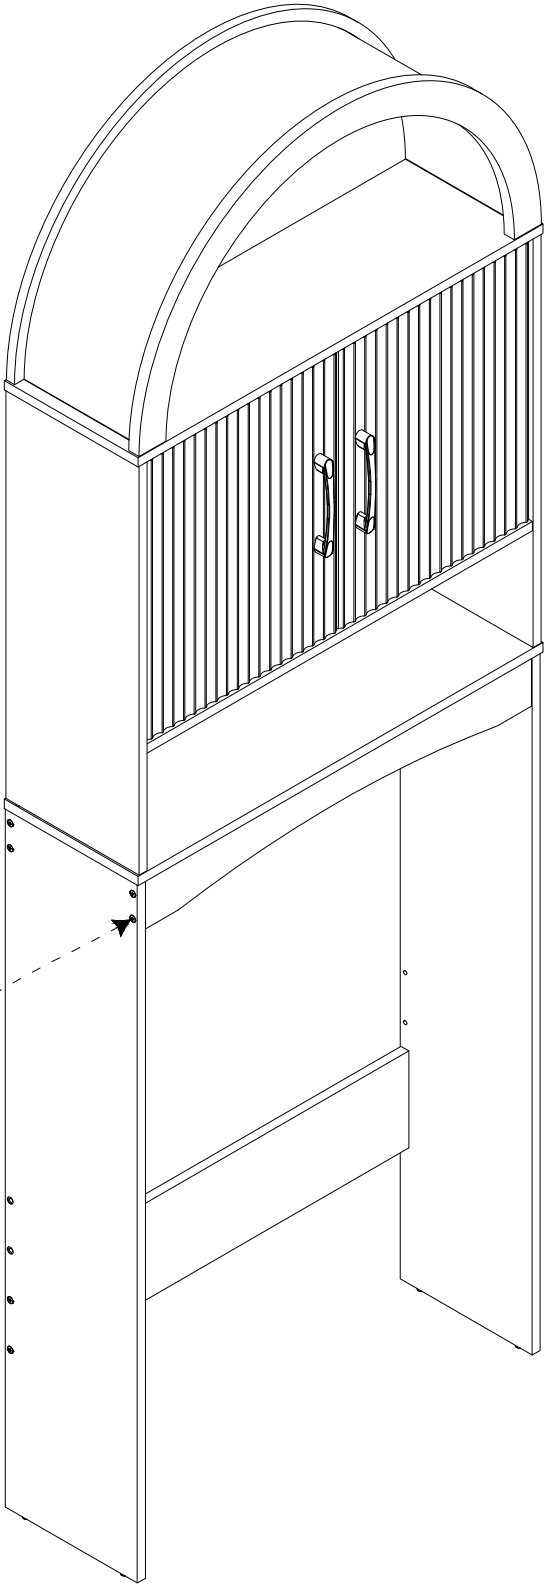

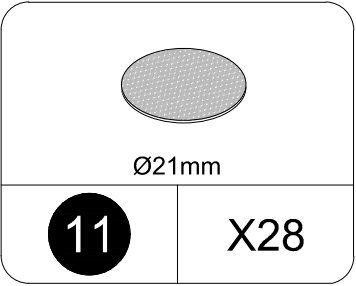

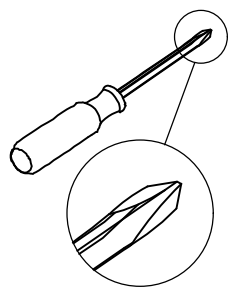

Loosen screw "B" and adjust door, if the door can not be adjusted, please loosen screw "C", then try again. Tighten screw "B" and "C".

To adjust side ways.

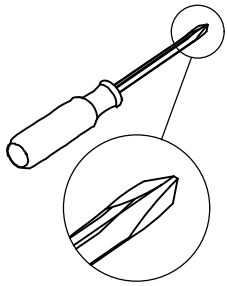

Turning the screw "C" on BOTH hinges on each door.

STEP19

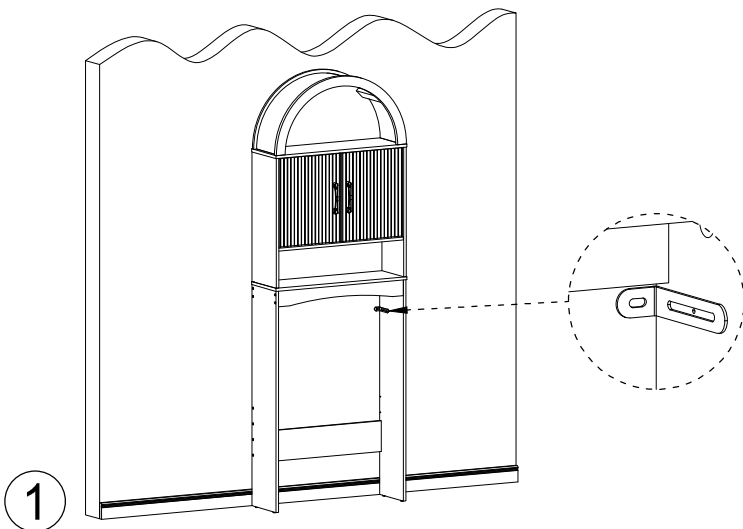

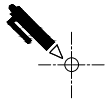

Stick the exposed holes of the cabinet body with hole stickers (11)

STEP20

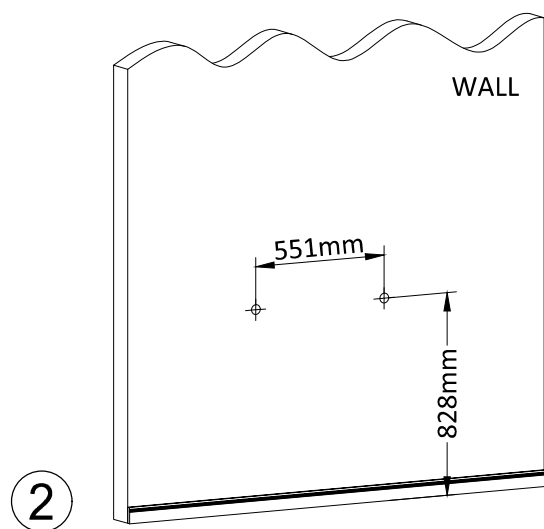

2pcs Ø4X40mm	2pcs Ø4X12mm	2pcs Ø8X29mm	2pcs 73X15X24mm
14	X1 set		

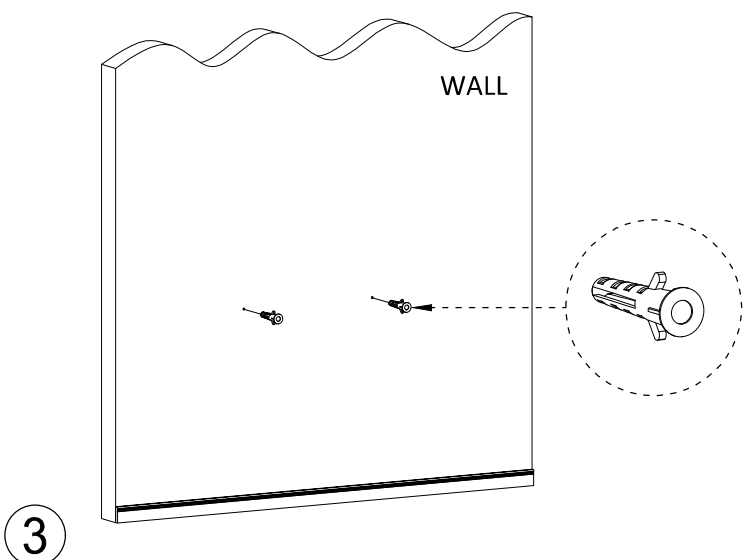

1. Put the cabinet against the wall and mark the hole locked against the wall with a marker.

2. Use an electric drill to drill 2 holes with a diameter of Ø 6 and a depth of 45mm at the marked location.

3. Place anchors (14) into the hole.

4. Push the shelf close to the wall, align it with the holes, and then tighten it with screws(14).
