

Wall Ending Shelf Installation Instructions

Sinber Cabinetry
2537 Loma Ave
South El Monte, CA 91733
Tel: 714-519-3575
<https://sinberus.heroecommerce.com/>

TOOLS REQUIRED

- Power Drill
 - Phillips Screwdriver
 - Level
 - Tape Measure
 - Included Screw Pack
 - Mounting Bracket (if applicable)
-

BEFORE INSTALLATION

- Verify all components are included: side panels, top panel, bottom panel, shelf panel(s), and screw pack.
 - Ensure the wall cabinet is securely installed before attaching the ending shelf.
 - Confirm the wall surface is flat and structurally sound.
 - Make sure the installation area is level.
-

INSTALLATION STEPS

Step 1 - Assemble the Shelf Frame

Attach the top and bottom panels to the side panels using the provided screws. Tighten securely to form the open shelf frame. Install additional shelves if included.

Step 2 - Position and Mark

Hold the shelf against the side of the wall cabinet. Align it flush with the cabinet edge. Use a level to ensure vertical alignment and mark screw locations.

Step 3 - Secure the Shelf

Fasten the shelf to the cabinet side panel using the provided screws.
If installing into drywall, use appropriate wall anchors.

Step 4 - Final Inspection

Check alignment with a level. Tighten all screws completely and confirm the shelf is

stable and secure.

IMPORTANT NOTES

- Two-person installation is recommended.
- Do not exceed the recommended weight capacity.
- Verify all connections are secure before placing items on the shelf.
- Use appropriate wall anchors when mounting to drywall.
