

Premium Hybrid Sleep System

Comprehensive Technical Specifications & Unboxing Manual

VACUUM-COMPRESSED SERIES

Product Philosophy

Engineering the perfect balance between reactive support and cooling comfort for a restorative sleep experience.

| The Hybrid Collection Tiers

Soft Series

Cloud Comfort

Firmness: 4.5 / 10

Designed for side sleepers seeking maximum pressure relief and a plush, weightless feel.

Medium Firm

Balanced Mist

Firmness: 6.5 / 10

Balanced medium-firm comfort with adaptive hybrid support and 2.2mm reinforced edge springs for added stability.

Extra Firm +

Lumbar Protector

Firmness: 8.5+ / 10

Flagship model with 2.5mm heavy-gauge springs. Superior lumbar care for heavy-weight support.

| Flagship Extra Firm Specifications

2.5MM

HIGH-TENSILE EDGE SPRINGS

8.5+

FIRMNESS RATING INDEX

Engineered for Durability

- ✓ **Anti-Sag Edge Support:** 2.5mm heavy-gauge perimeter prevents edge collapse.
- ✓ **Lumbar Guard:** Targeted firm support for spinal alignment.
- ✓ **Strong Support Capacity:** Optimized for sleepers who prefer firm feel and full-body support

Functional Zoned Support

Our multi-zone pocket spring system adapts to your unique body contour. By varying spring tension across different zones, we provide:

- Targeted Hip & Shoulder pressure relief.
- Reinforced Lumbar support to prevent back pain.
- Minimal motion transfer between sleepers.

| Cooling Gel & Breathability

Advanced Thermal Regulation

Infused with cooling gel particles, our open-cell memory foam increases airflow and heat dissipation by up to 30% compared to standard foams.

The gel layer absorbs excess body heat, maintaining a neutral sleep temperature throughout the night.

| Safety & Global Certification

Fiberglass-Free

100% chemical flame retardant free. We use natural fire-resistant barriers for ultimate lung and skin safety.

CertiPUR-US®

Foam made without ozone depleters, heavy metals, or formaldehyde. Low VOC emissions for indoor air quality.

OEKO-TEX® 100

Standard 100 certified. Every thread and component tested for harmful substances for a safe environment.

CFR 1633

Fully compliant with US Federal Flammability standards for professional-grade safety assurance.

Installation & Unboxing

Quick and safe steps to revive your vacuum-compressed mattress.

| The 4-Step Recovery

1

Position

Place the rolled mattress on your bed frame.

2

Unwrap

Carefully cut the outer plastic wrap.

3

Expand

Watch it decompress to its full height.

4

Wait

Allow 48-72 hours for full core recovery.

US Standard Size Guide

Size Category	Inches (W x L)	Centimeters (W x L)	Ideal For
Twin / Twin XL	38" x 75" / 80"	96.5 x 191 / 203 cm	Single Sleepers / Dorms
Full (Double)	53" x 75"	135 x 191 cm	Studio / Small Bedrooms
Queen	60" x 80"	152 x 203 cm	Most Popular for Couples
King	76" x 80"	193 x 203 cm	Spacious Master Bedrooms
California King	72" x 84"	183 x 213 cm	Tall Sleepers / Extra legroom

Care & Maintenance Guide

Proactive Maintenance

- 🔄 **Rotate, Don't Flip:** Rotate 180° every 3-6 months to ensure even wear. This is a one-sided hybrid system.
- 🛏️ **Foundation:** Use a solid or slatted base (slats < 3" apart) to maintain spring integrity.
- 🚫 **Avoid Folding:** Never fold the mattress once expanded, as it damages the pocket springs.
