

Installation Steps:

Thank you for using our products. Please read the operation manual before installation. Please keep this operation manual as a reference. Disconnect the power supply before installing this product. Installation by a professional electrician is recommended.

1. Install the two iron pipes in sequence on the screw above the light fixture.
2. Suspend one end of the chain on the iron pipe ring and install the other end on the pendant square plate.
3. Secure the pendant plate to the reserved mounting box.
4. Connect the black wire to the fire wire and the white wire to the zero wire with wire caps and wrap tightly with insulating tape. Connect the ground wire of the fixture to the ground wire of the junction box.
5. Secure the fixture to the wall plate with round head nuts.
6. Remove the plastic ring on top of the lamp head, install the lampshade in the lamp head position, and then secure it firmly with the plastic ring.
7. Install the light bulb.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
