## **Maintenance:**

1. The first cleaning of baby bedding, the cleaning time should be treated differently according to the season and personal habits. The general cycle is once a month. Newly bought baby bedding must be rinsed with water once to wash away the pulp and dyeing floating on the surface. It is relatively soft to use, and it is not easy to fade after washing.
2. The cleaning of bedding should be divided into materials.  
Washing steps for washable baby bedding:
  - 1) Pour in neutral detergent, and control the water temperature at about 30 degrees Celsius. After the detergent is completely dissolved, put in the bedding for cleaning .
  - 2) Colors of different shades should be washed separately to avoid mutual staining.
  3. The storage conditions should be superior. When the product is stored. Please clean, dry thoroughly, fold neatly, and then put a certain amount of mothballs in a dark place with low humidity and good ventilation. Products that have not been used for a long time are best placed in the sun.
4. Supplementary knowledge of maintenance:
  - 1) When washing linen products, do not rub or twist it hard (because the fiber is brittle and easy to fluff, which affects the appearance and service life).
  - 2) When collecting cotton and linen products, care should be taken to keep the environment clean to prevent mildew. Light-colored and dark-colored products should be stored separately to prevent shading and yellowing.
  - 3) White silk products cannot be placed in mothballs or camphor wood boxes, otherwise they will turn yellow.

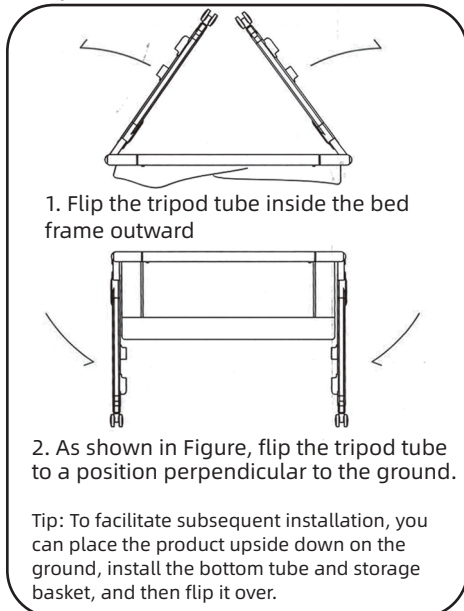

## Unpacking steps

Open the cardboard box and remove

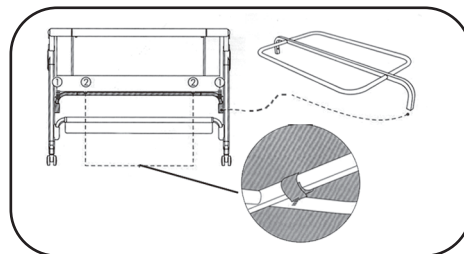

- 1 Bed frame
- 2 Bottom tube
- 3 storage basket cover
- 4 storage basket frame
- 5 Mosquito net
- 6 Fixed webbing
- 7 Mattress

### Step1: Unfold the bed frame

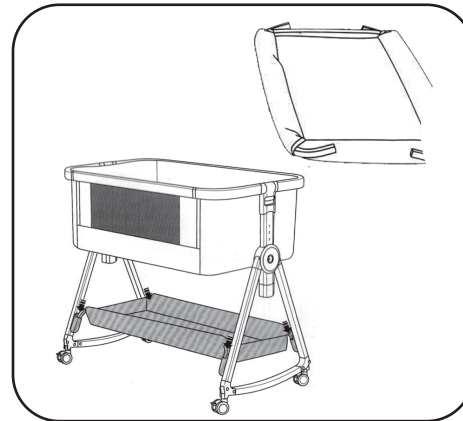

### Step2: Install the bottom tube

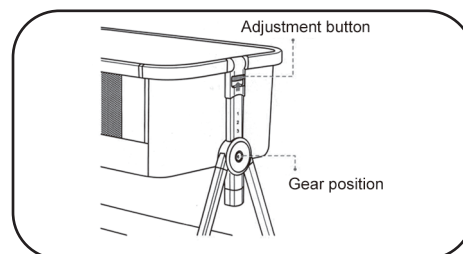

- Place the two feet of the bottom tube separately into the holes on the inner side of the height adjustment rod until a "click" sound is heard, indicating that the installation is in place.
- After installing the bottom tube, the four velcro strips on both sides of the bed bottom need to be fixed to the rods on both sides of the bottom tube.

### Step3: Install storage basket

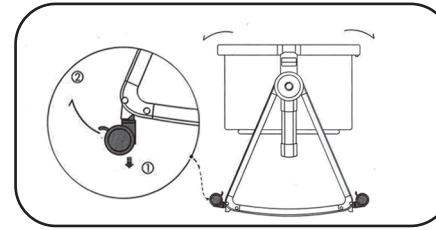

As shown in the figure, insert the two storage rack rods into the storage basket cover respectively, then insert the storage baskets into the corresponding holes below the tripod tube until a "click" sound is heard indicating that the installation is in place. Then put the mattress in the crib.

### Dispatch regulation

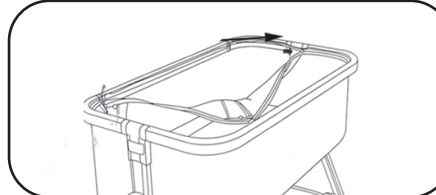

- Press the adjustment button to adjust the height of the 6th gear, with the same adjustment method on both sides.
- The circular hole in the middle of the tripod tube can display gear numbers.

## Cradle Mode

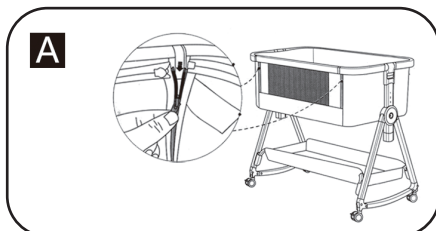

Pull the universal wheels of the four legs of the crib down and then flip them up to switch to cradle mode.

## Remove the cloth cover

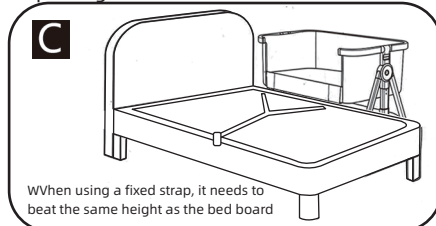

- Open the zipper head protective cover.
- Pull the zipper along the top of the bed frame to remove the fabric cover.

## Splice King Bed

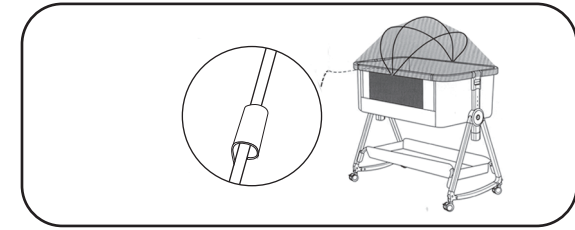

Open the side zipper: as shown in Figure A  
 1. Open the zipper head protective cover.  
 2. Open the two zippers at the side frame opening.

As shown in Figure C.

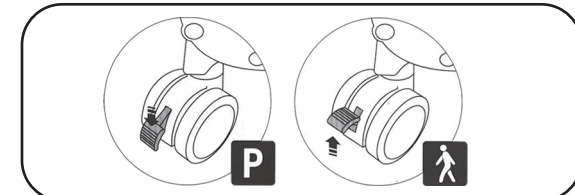

- Place the crib beside the bed in a suitable position and apply the brakes on all four wheels.
- Adjust the height to be level with the king bed.

## Install mosquito nets

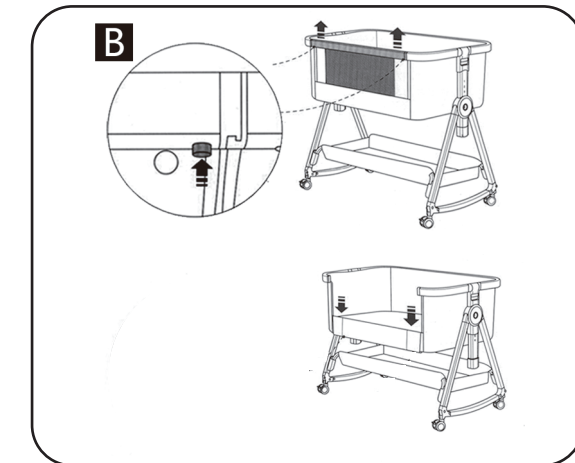

As shown in the figure: Fix the buckle on both sides of the mosquito net to the side of the bed frame, and then pull up both ends of the mosquito net to cover the guardrail of the baby bed.

## Baby Bedside Brake

Press the brake device on the four universal wheels of the crib, and the crib is in a braking state. Lift the brake device of the four universal wheels on the crib side bed, and the crib is in an active state.

**Warn:** Four brake devices must be pressed when the crib is parked!

Open the side border: as shown in Figure B.  
 1. Simultaneously press the disassembly button below both ends of the border.  
 2. Lift the border up and flip it outward and downward.
