HINGE ADJUSTMENT INSTRUCTIONS

Cabinet doors can be adjusted in **three directions** to achieve proper alignment.

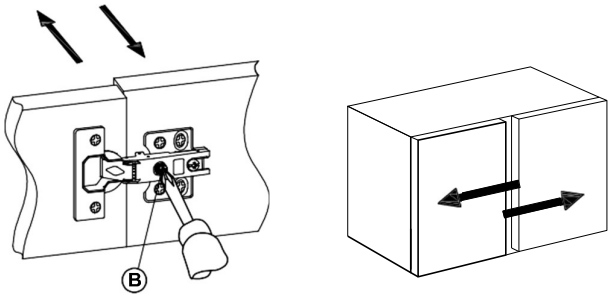

Depth Adjustment (In / Out)

Turn adjustment screw **(A)** to move the door **inward or outward**.

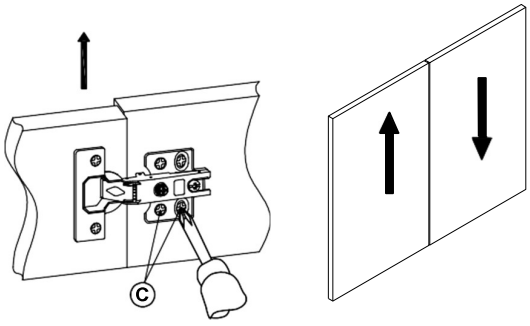

Side Adjustment (Left / Right)

Turn adjustment screw **(B)** to move the door **left or right**.

Height Adjustment (Up / Down)

Loosen screws at position **(C)**, adjust the door **up or down**, then re-tighten the screws.

Tip:
Make small adjustments and check the door alignment after each adjustment.

IMPORTANT SAFETY INFORMATION

- Do not fully tighten screws until all parts are properly aligned.
- Over-tightening hardware may damage the product.
- Professional installation is recommended if you are not familiar with plumbing connections.
- Keep all small parts away from children during assembly.
