

Item #: SK-3948FSNB

Before installing this lamp, please read the following instructions thoroughly and remove all plastic covering from the lamp. This shipment comes in two (2) packages. Please contact the marketplace where the item was purchased if any box is missing. For easier installation, 2 people are recommended for the installation process. Place the lamp indoor, on dry area only. The lamp produces very high temperature; always unplug electrical cord and allow sufficient time for bulb to cool down before replacing bulb or parts.

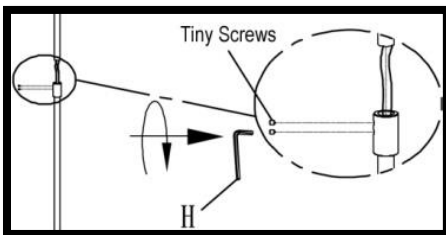

Instructions:

1. Place **part E (Base Cover)** on top of **part D (Base)**, then find **parts F/G (Body Stem of the lamp)**.
2. Carefully position the base perpendicular to the floor for easier installation. Find **parts A (Screw cap)**, **B (Washer)**, and **C (Spring washer)** then screw in tightly with provided **part J (Wrench)**. Use around twenty pounds of force to pull the excess cord all the way out to the bottom of the lamp so it straightens inside of the lamp pole.

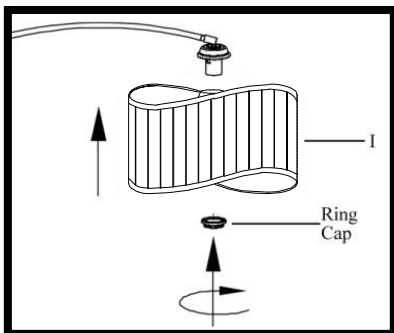

Parts A, B, C
are pre-installed
under the tube

3. Connect **parts F/G (Body Stem of the lamp)** with the tiny screws which are pre-installed on the stem of the lamp using **part H (Allen wrench)**.

4. Unscrew the ring cap from the head of the lamp and install **part I (Lamp shade)** with the ring cap.

Please Note*****:

***The lamp was designed to be sleek and slim with its unique curve. It is normal if the lamp has a small wobble, but the lamp will not tip over due to the heavy-duty base.

***Make sure the body stem is installed pointing towards the correct direction (please see image below).

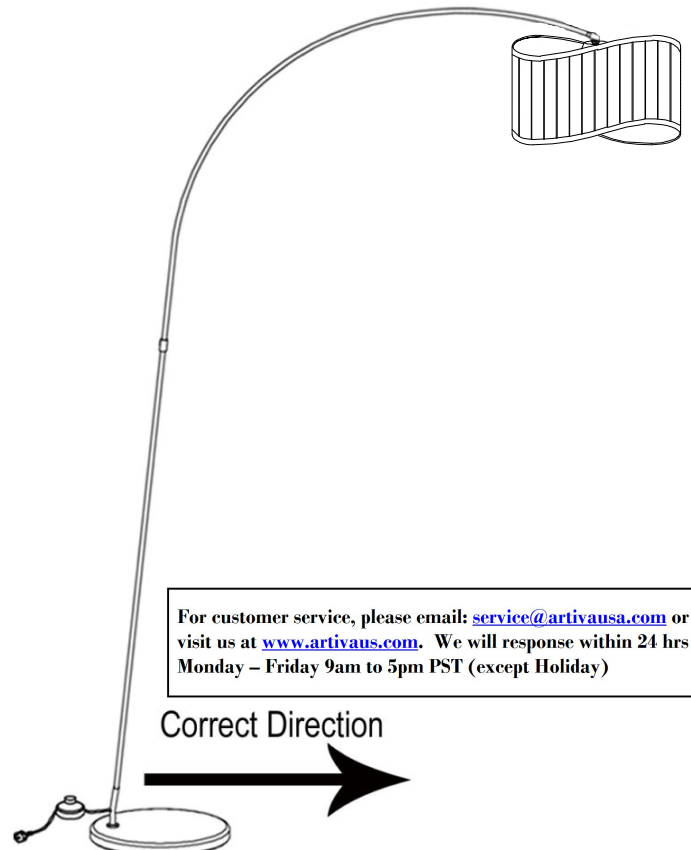

***An **extra** tiny screw has been provided in the hardware pack for your convenience.
