ASSEMBLY INSTRUCTION

**A x 1**

Carefully unfold the front, back, and side panels.

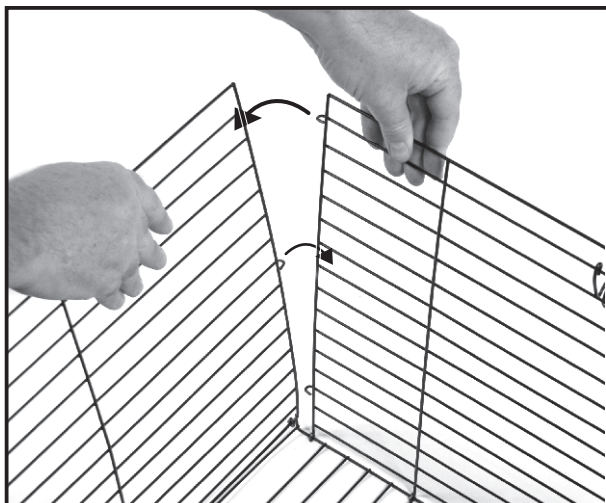

01

If any panels have become stuck together, separate them by carefully moving the panels side to side to free them.

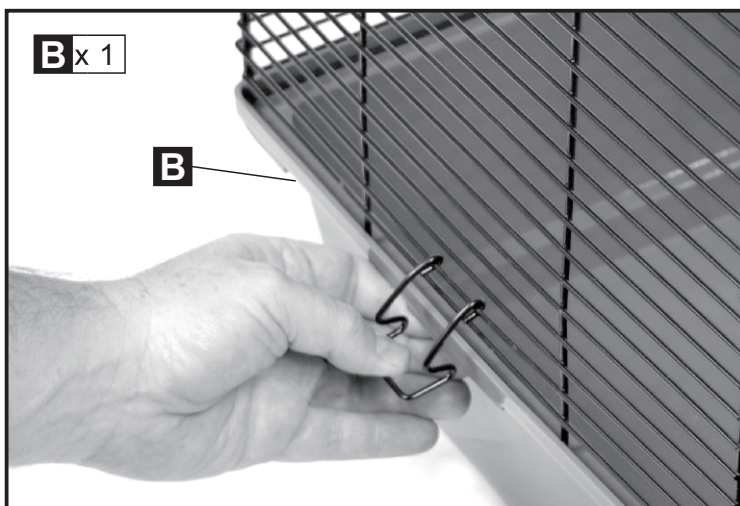

02

Connect the front cage panel (includes doorway) to the side panel as shown. The "J" shaped wire hooks are specially designed to hook onto the side panel alternating the connection back and forth. Then the front panel and the side panel again to create a woven connection joint.

Repeat this connection between the remaining panels in each corner using the alternating "J" shaped hook.

: Start by attaching bottom "J" hook and move up and attach top "J" hook last

B x 1**B**

Place the assembled wire top onto the base making sure the wire panels rest securely along the top edge of the base. Secure the top panels to the base using the 2 wire latches located on each side.

03

G x 4

H x 2

Turn base upside down. Insert 4
Caster Wheels and 2 Locking Wheels.

04

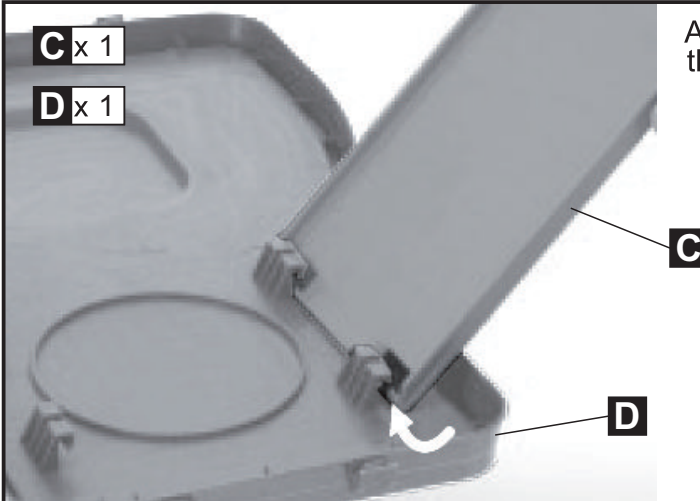

C x 1

D x 1

Attach the plastic ramp to the bottom side of
the plastic shelf by snapping it into the clips.

05

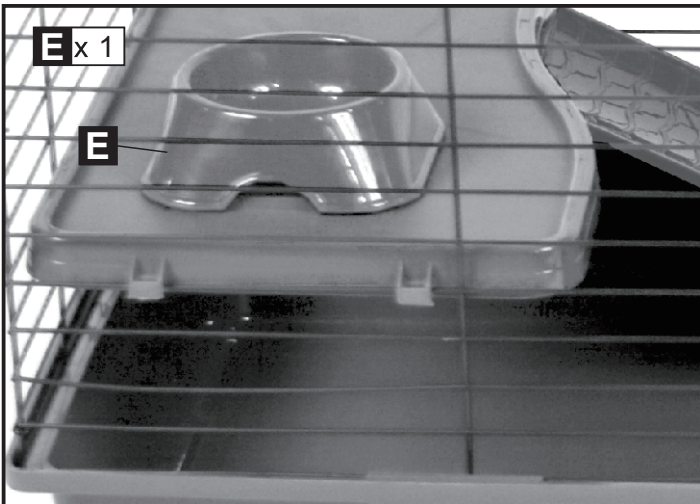

E x 1

E

Place the assembled shelf and ramp in the
cage through the door. Attach the shelf to the
5th wire up from the bottom on the left side of the
cage.

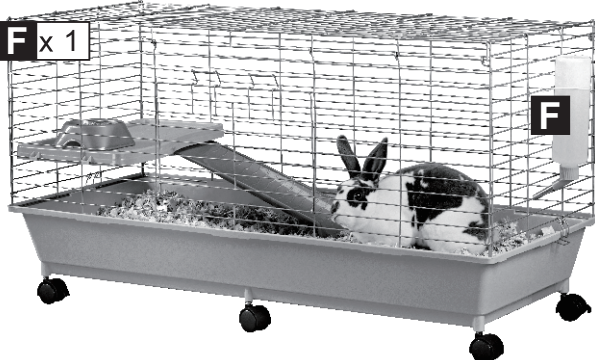

06

F x 1

Position the water bottle on the outside of the
cage with the metal sipper tube inserting into the
cage at a level easily accessible for your pet.
Wrap the hanger around the bottle and attach the
wire clips to the cage. Place the food bowl on the
raised portion of the shelf.

07

Your pet needs a constant supply of food and water as well as occasional treats. Provide your pet with fresh water and food daily. When re-filling the water bottle, remove from hanger and unscrew cap. Be sure to fill completely with cool clean water and replace the cap. (a few initial drips are normal while the vacuum forms so the bottle will perform properly).
