Project Name: _____

Fixture Type: _____

Date: _____

DIMENSIONS

PRODUCT SPECIFICATIONS

Fire Enclosure provides fire barrier around recessed lights. Easy installation reduce labor cost significantly.

- 2" wide nailing flange on all sides
- To be used with Mica tape (FIRETAPE) to seal the power feeding point.
- 1 hour fire rating
- Fits both 16" and 24" on-center ceiling constructions
- Install easily with drywall screws or staples
- Meets the specifications of:
UL 263, ASTM E119

INSTALLATION

Description: Firebox is designed for easy installation. It fits both 16" and 24" on-center joint applications. It also can be used as vapor barrier for other openings. Can be installed before or after recessed fixture installation.

Mounting: Mounts quickly with staples, nails or screws with flat washers to the ceiling structure (2" wide nail flange on all sides).

Sealing: Seal power feeding point with FIRETAPE.
