

# LED Wall Sconces

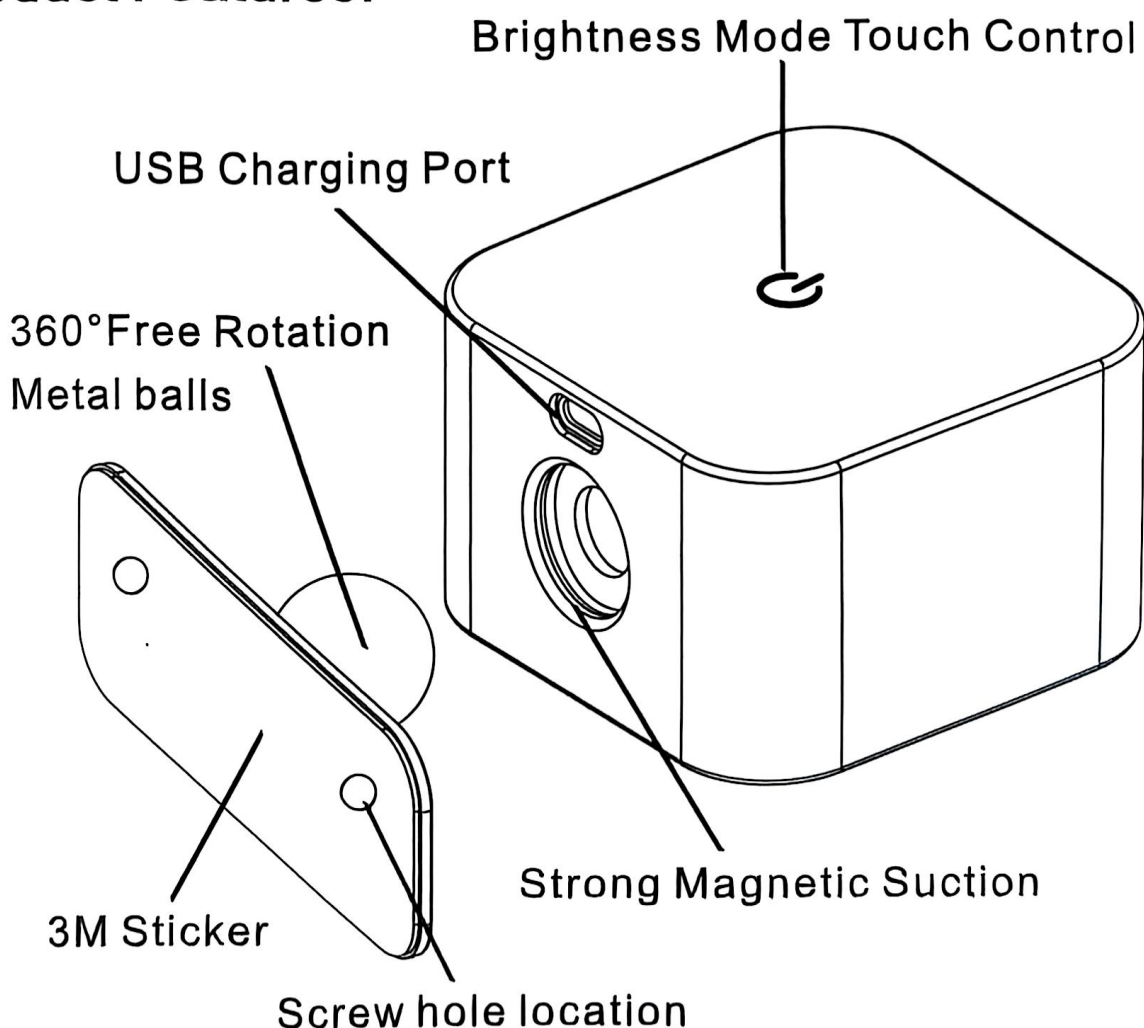

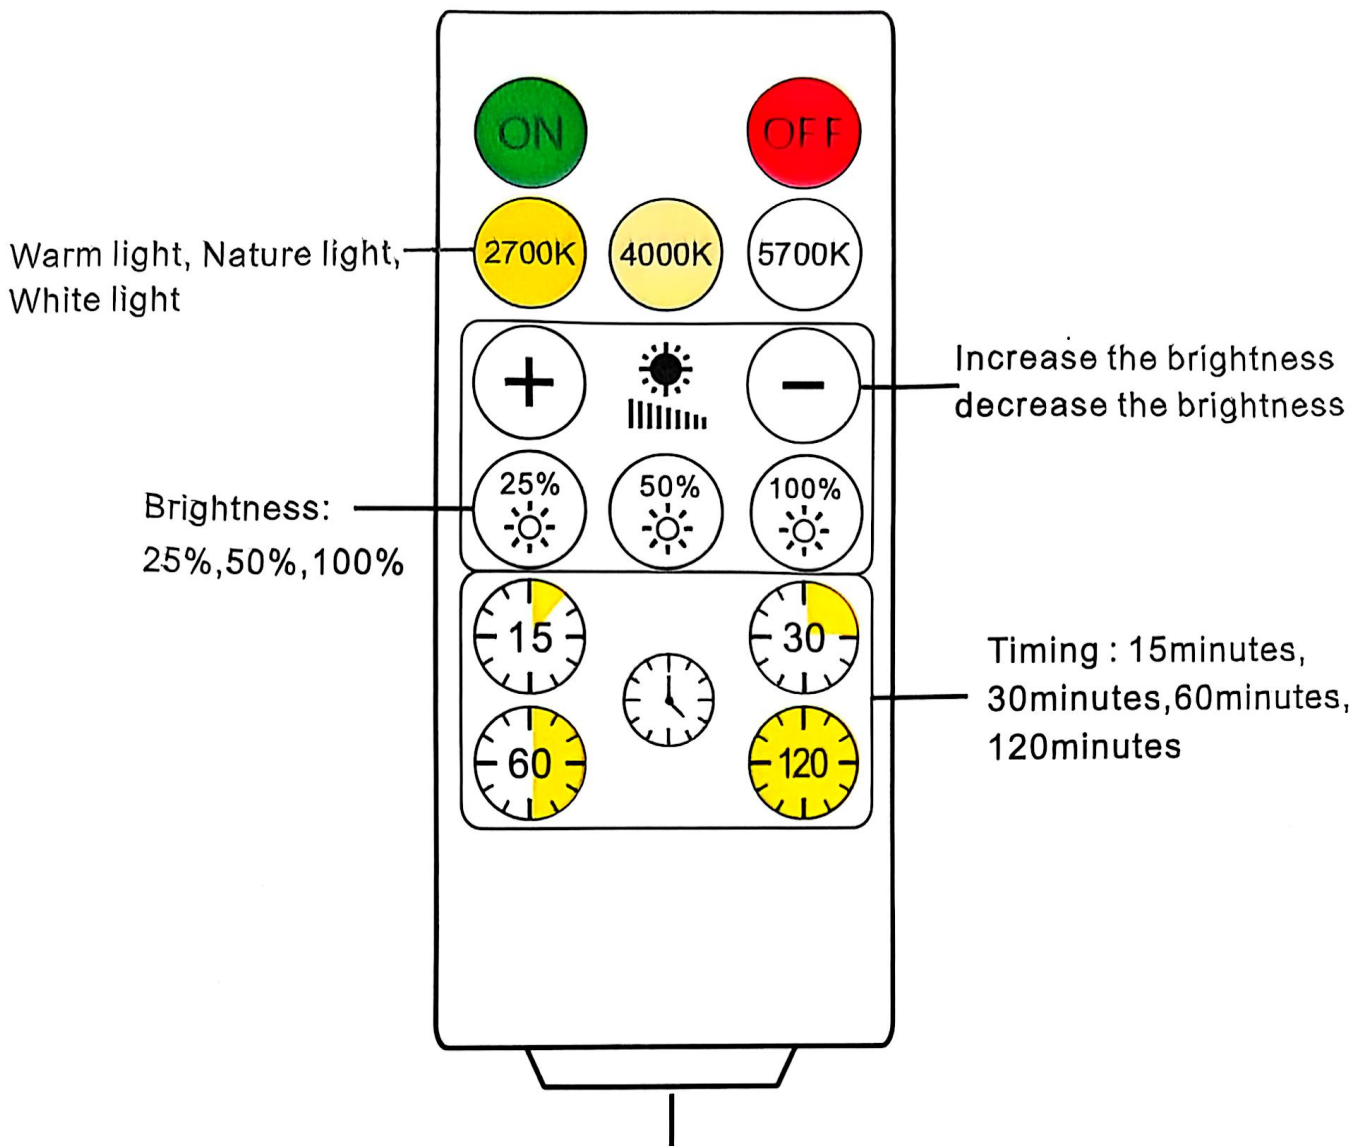

## Product Description:

This LED wall reading light is equipped with a magnetic holder. It can be fixed to the wall with 3M adhesive or screws. It is easy to remove the light from the magnetic holder for charging or use as a portable light in various places. Widely used in closets, TV walls, living rooms, bedrooms, dens, stairs and hallways.

LED wall reading light has two operation modes. You can use remote control to turn ON/OFF, adjust brightness or touch the button on back of the light to operate the same. You also can use remote control to set any levels of brightness and set 15minutes/30minutes/60minutes/120minutes timer auto-off the light.

## Product Features:

Please remove the plastic insulation sheet first from the button of the remote

## Instructions

1. Touch the button to adjust the light brightness: Low - Medium - High.
2. Long press 2 seconds to change the color temperature.
3. Memory function - 30 seconds after the light is on, press the switch directly off. Power on again will return to the current settings.
4. The light controller is equipped with a CR2025 button battery at the factory. To ensure that no electricity is lost during transportation, we add a piece of transparent PVC insulation film between the contact point of the battery and the remote control. When you use it for the first time, you need to pull it out and use it.
5. Charging: Red light; Full: Green light.

## Warning:

1. Do not use this wall sconce in temperatures above 60 °C or -30 °C. Extremely hot or cold environments can cause damage to the LED and battery.
2. Do not use a charger with more than 5V to charge.
3. Please do not put the lantern in a flammable or humid place.
4. Please fully charge when not in use for a long time.
