

INSTALLATION TOOLS

- 1 Choose the right nail (choose one of them)

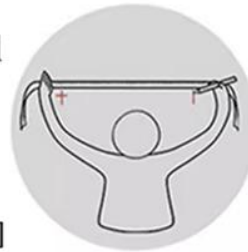

Suitable for small size hanging pictures

Suitable for large size hanging pictures
(screws need to be drilled in the wall before use)

- 2 Determine the location of the wall nails

Use a ruler to measure, use a pencil to make a cross mark positioning need to pay attention to the distance between the nails equal to the distance between the hooks in marking the nail position, to keep level

3 Staple and hang the picture correctly

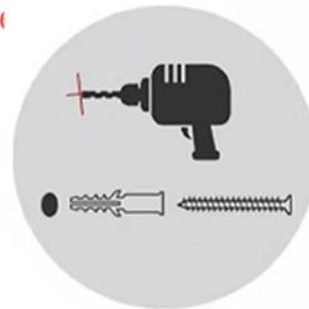

Suitable for small size hanging pictures

Screw into the straight nail against the cross mark, align the hook with the nail and hang it.

Suitable for large size hanging picture

The screw is first drilled against the cross mark, then the gel is inserted into the hole, the screw is screwed into the preset gel and finally the hook is aligned to hang the picture.

4 Check. Installation complete

Place the level above the painting to check whether the painting is level, and the water bubble inside the level can stay in the middle
