

15¾" Square Wall Clock Distressed

Congratulations on your recent purchase. In order to ensure that your wall clock maintains its attractive appearance, proper and preventative maintenance goes a long way. Here are a few tips and tricks in order to help you do so:

Wood Care: Do not directly place in direct sunlight doing so will help protect the clock's fresh look.

In Case of:

- A scratch or small ding on frame: Dab at the site with a proper wood repair marker a shade lighter than the actual color until it matches the finish. A simple and quick way to fix little mishaps.
- Fingerprints or Smudges: Use a glass cleaner paired with a soft nonabrasive cloth to lightly mist the cloth and then rub the surface clean.

Routine Maintenance: Wipe the clock down with a dry soft cloth once a week, in order to prevent dust from accumulating. You can also wipe with a non abrasive cloth to keep your new wall clock in pristine shape.
