Pressure relief valve	Built in pressure relief valve
Drain line	½" copper line, ½" NPT female thread
Dedicated circuit required	
Generator: S-450	4.5KW, 240V, 19A,

Installation Notes

Install this product according to the installation guide.
Factory sized: L x H x W = cubic feet. Choose the appropriate model. For every foot of ceiling height over 8 ft use the next larger steam unit. Always round your measurements up. Wall material is irrelevant.
For this steam generator, do not exceed the maximum volume rating:

Steam generator model	Power rating	Maximum volume rating
Generator: S-450	4.5KW,	90 cu ft
