

SmartFridge by Minibar Systems

Unpacking Instructions

Congratulations on your purchase of SmartFridge by Minibar Systems. We want to ensure the best possible experience with our product so please follow these instructions when you receive your SmartFridge.

- Ensure the box is in the upright position by checking the label on the outside of the box
- Open the top of the box
- Lift the SmartFridge out of the exterior box with the straps and place in upright position
- Cut the straps
- Lift the box straight up exposing the SmartFridge which sits on a base.
- Carefully lift the SmartFridge off the base and place on floor in upright position
- Let the unit “settle” for 24 hours before plugging it in. This is extremely important as the compressor oils and coolant were disrupted during shipping and need to settle down before being warmed up and mixed together in normal operation when plugged in. Note, if the unit is plugged in before 24 hours, there is a high risk that the unit will not operate properly as the oils and coolant will be mixed throughout the compressor.
- Please be sure to download the user manual from Wayfair.
- Enjoy your SmartFridge!
