Product Features:

Please remove the plastic insulation
sheet first from the button of the remote

Using Instructions

1. 2 ways control mode: Touch control + Remote control
2. First turn on the button on the back of the touch light, then use the remote control.
3. Memory function: Last Brightness level and Timer auto-off will be remembered when turn on again.
4. Short touch the button to adjust the light brightness: Low - Medium - High.

5. Long press Touch control 2 seconds to change the color temperature.

6. Remote control is operated by a CR2025 cell battery (included). To ensure that no electricity is lost during transportation, we add a piece of transparent PVC insulation film between the contact point of the battery and the remote control. When you use it for the first time, you need to pull it out and use it.

7. Charging: Red light; Full: Green light.

Warning:

1. Do not use this wall sconce in temperatures above 60 °C or -30 °C. Extremely hot or cold environments can cause damage to the LED and battery.

2. Do not use a charger with more than 5V to charge.

3. Please do not put the lantern in a flammable or humid place.

4. Please fully charge when not in use for a long time.
