Board Identification

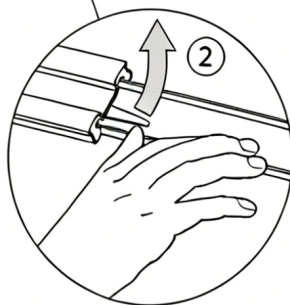

Slides Must Be Separated Before Assembly.
After Separated, Set Aside Until Needed for Assembly.

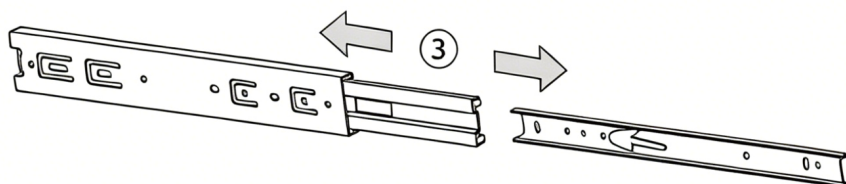

STEP 1: Extend Slide

STEP 2: Push Lever UP

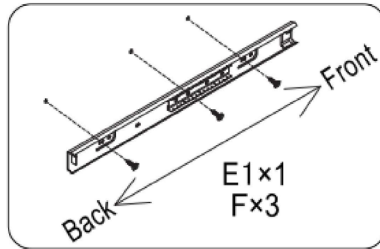

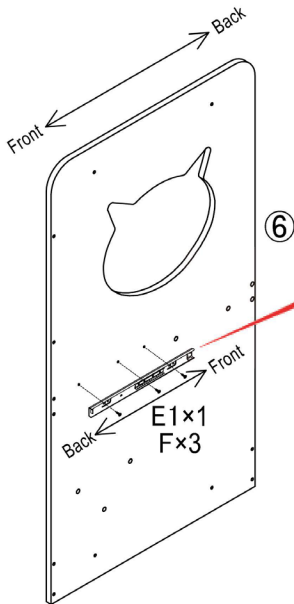

STEP 3: Remove Runner

Installation Steps

1

1. When installing the slide rails, please pay attention to the correct orientation, as there is a front and back to their placement.

2. Make sure the screws are driven all the way in; otherwise, the slide rails may become stuck or operate unevenly.

A x 12 B x 12

8

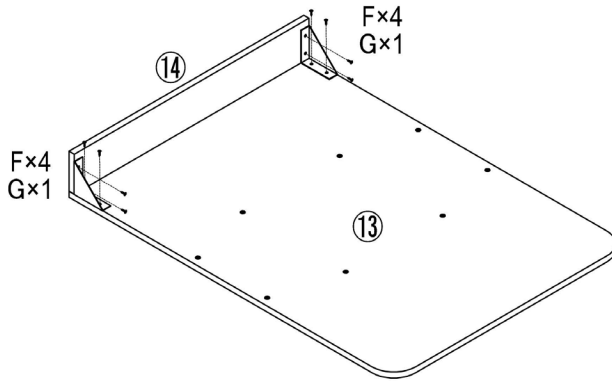

Install with the side that has mounting holes facing inward.

C x 2

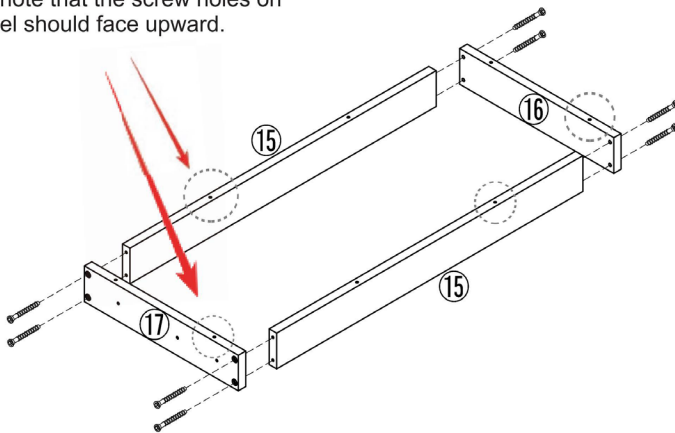

Installation Steps

9

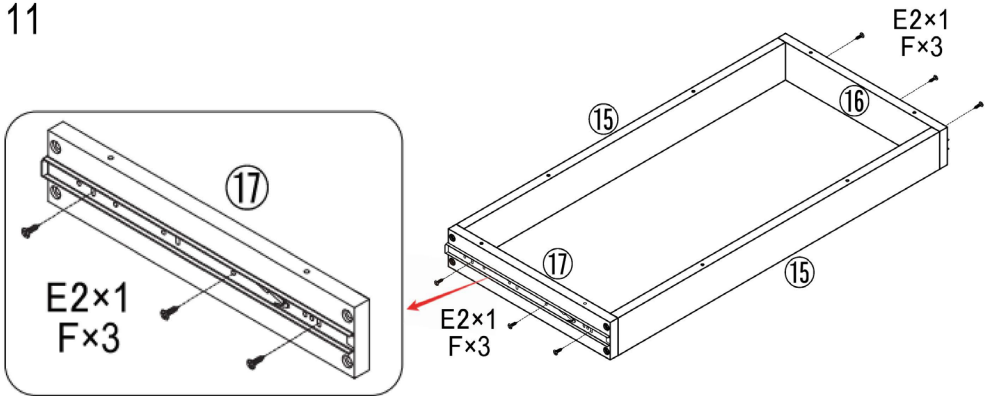

10

Please note that the screw holes on the panel should face upward.

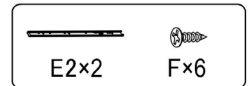

Installation Steps

11

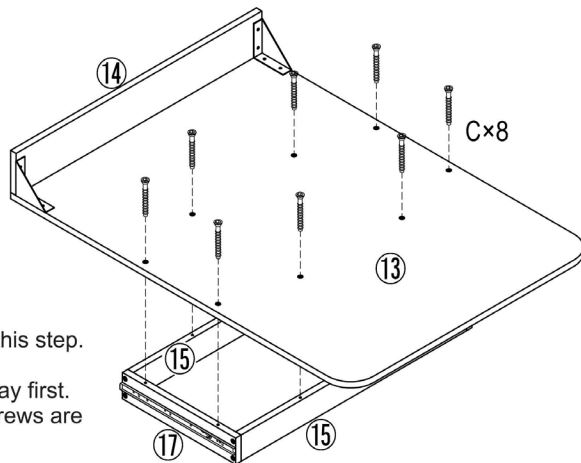

1. Before installation, the slide rails need to be separated into two parts. Then install them according to the diagram. (Refer to the first page of the installation instructions.)

2. When installing, make sure the screws are fully tightened to prevent the slide rails from becoming stuck or moving unevenly.

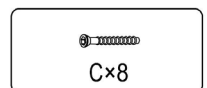

12

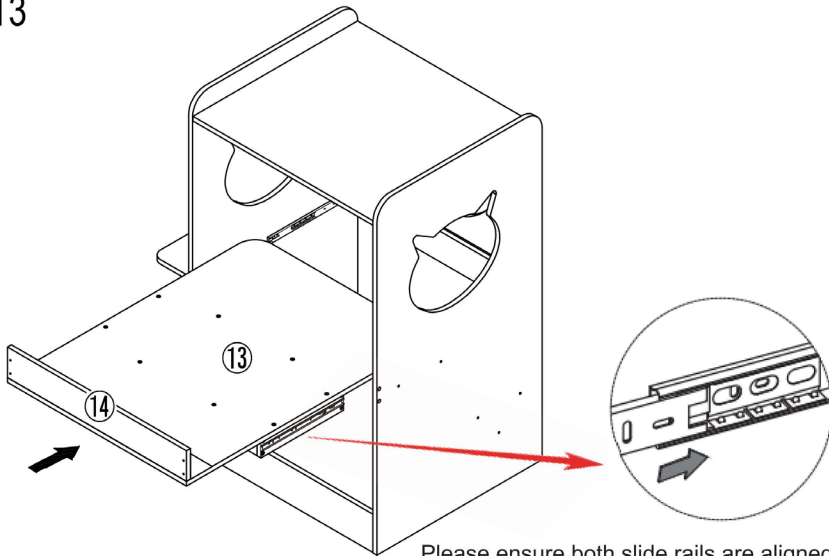

Two people are needed for this step.

Pre-install each screw halfway first. Fully tighten only after all screws are in place.

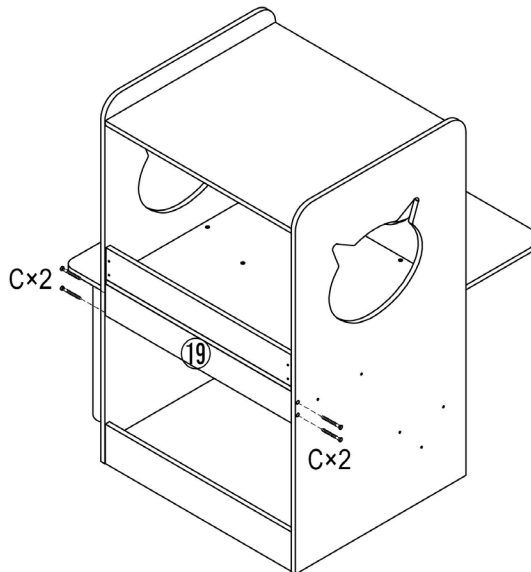

Installation Steps

13

Please ensure both slide rails are aligned with their corresponding tracks before pushing inward, to prevent the drawer from tilting.

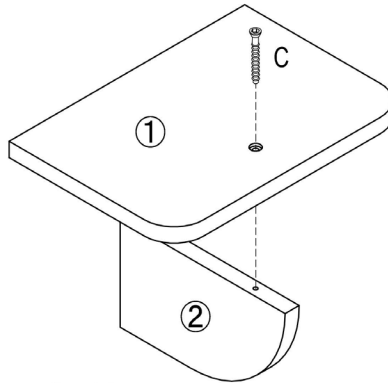

14
