

Metal Garden Shed

OWNER'S MANUAL

Size 4 Ft X 9 Ft

Tall walk in Shed

Quick & Easy Assembly

Ridge Reinforced walls

Wide Double Doors

Available in Various Sizes

Take care of sharp edges;

Please wear gloves;

It will take 2 people 6-8 hours to install.

Introduction

Thank you for purchasing our storage rack.
For safe and proper use, please be sure to read this manual before use.

Improper use may result in serious accidents.
Please read and understand this manual thoroughly before use.
Additionally, be sure to read the warnings and precautions on every page.

The product you purchased was manufactured under our strict quality control standards. However, due to factors such as vibration during transportation, the product may become loose. Please inspect the item upon receipt to ensure it is in proper condition. At that time, please accept the instruction manual and keep it in a safe place. For use by children, guardians must read the manual and provide guidance.

Please read carefully before assembly

The following information contains important instructions for the safe use of storage racks. Please read carefully and use correctly.
Failure to comply with the instructions herein may result in serious personal injury, including customer injury, as well as property damage such as product damage.

Product Specifications

- Due to the product's characteristics of assembling components at the installation site, some gaps (light leakage) may occur.
- Due to the product's design, it is not completely waterproof. Water may enter through gaps between components.
- Due to the issues mentioned above, please be aware that dust, insects, rodents, and other small animals may enter, or powdery snow may be blown in.
- Transportation may cause damage to the painted surface. Minor scratches will be addressed using touch-up paint.

FOR YOUR SAFE USE

Note

Instruction

- Regarding Installation Location**
Avoid installing in areas where significant snow accumulation or rainwater runoff occurs beneath the roof, as this may cause damage, deformation, and leaks.
- Avoid installing in high places such as rooftops or locations with significant height differences like cliff edges, as there is a risk of tipping over or falling due to strong winds.
 - Do not place items on apartment railings or other locations that could block evacuation routes or where crossing the railings could cause children to fall or objects to drop.
 - Avoid installing equipment near the vent outlet of water feeders where highly corrosive gases may be emitted, as the exhaust gases may cause coating deterioration and rust/discoloration.
 - Leaves and debris near the base of the tree may clog the rain barrel, potentially causing leaks or corrosion.
 - On lawns or uneven, uncompacted surfaces, nails may become loose over time.
 - Near the property line. (Factors such as rainwater runoff, splashback, snow accumulation, and sunlight obstruction affecting neighbors must be considered.)
 - Areas with soil or similar materials on the ground are susceptible to moisture, which may lead to condensation and mold growth.
 - In areas where the ground freezes, door installation may become difficult.
 - Areas exposed to pharmaceuticals and deicing agents may experience discoloration or corrosion of the main body.
 - In areas with high salt content (such as coastal regions), the main body of the storage box may corrode. It is recommended to wash it with water regularly.
 - If adjacent to a building, ensure the roof width and the designated space required for assembly and construction.

Precautions for Assembly and Construction

- Before assembly, place the assembly area on a level surface. Perform grounding procedures simultaneously.

FOR YOUR SAFE USE

! NOTE

- Please wear protective equipment such as gloves, long-sleeved shirts, and overalls for assembly work. Although we do our best, you may get injured at the corners or ends of the parts.
- When assembling or transporting heavy objects (especially those over 30kg), please be sure to have two or more people on the line. Injuries or low back pain may occur.
- If the assembly is interrupted and left unattended, parts may be scattered or toppled due to strong winds. If you have to leave the site, secure the parts with support columns or ropes.
- Construction should be avoided on windy days. Parts may be damaged by a drop or injured by flying parts.
- To prevent tipping, be sure to carry out the prescribed foundation work. In the event of strong winds such as typhoons, it is possible to fall and cause serious injury or damage to the storage.
- After assembly, please confirm that the bolts are not loose or you forgot to install the accessories. If it is not assembled correctly, the specified strength will not be ensured.

Instruction

Precautions for use

- Do not place objects on the roof, climb, hang, jump from other buildings, etc. Injuries or damage may occur due to falls or falls, etc.
- In the event of strong winds such as typhoons, the door may open or fall off, so be sure to lock it. Contents may be blown off, damaged, or tipped over.
- Please refrain from overexertion. Although it is a solid column structure, the door posts can be deformed or injured.
- Do not use for non-storage purposes (e.g. playgrounds, part of housing, etc.). This can lead to accidents.
- Do not place items on the roof or walls. There is a risk of injury if it is blown down or blown away by strong winds. In addition, if there are scratches on the painting, it will also cause rust.
- Lockers can get hot due to direct sunlight. Be careful with burns.
- Please note that wet shoes or floors such as rain and snow are prone to slipping.

ASSEMBLE

General Steps

Please read these instructions carefully before assembly to understand the assembly method and precautions. Please fully understand the relevant contents.

Open the carton and compare it with the described and illustrated parts to make sure all the parts are complete, carefully identify and confirm

Precautions

- The location of the cottage must be level. If the surface is uneven, the location of the part hole may be eliminated.
- It is recommended that you secure your cabin.

Recommended Tools

Safety Precautions

Some parts may have sharp edges. Gloves are recommended for handling these items, gloves are recommended when wearing safety glasses, and safety shoes are recommended.

Don't build a cabin in a windy environment. Soon after the cottage was built, it was ensured that it was firmly anchored to a solid foundation. It is advisable to build a hut with multiple people.

LSM		

F14: This component is only compatible with F1, F3, and F11. It is located in the external tool room and is easy to seal and waterproof.

LSM: The installation position of the door for this product can be adjusted.

tip: The installation position of the door for this product can be adjusted.

If there is slight bending
on the corners

Pls wear gloves and stretch
the corners slightly until
they are flat

Then the sheets will be normal and there is no effect on the assembling

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

Unit: mm

The installation space must be level and measure at least 2800 x 3600 millimeters. The foundation must be anchored to the floor within this space.

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

Note: Take care of sharp edges.

All panels are clearly marked and care should be taken to use the bcorrect one. It is important that these instructions are followed step by step.

F11		11

The back of the door

Notice: Assemble components according to the positions shown in the diagram.
A: Align the holes of the other M with the previously installed M, then secure both Ms together from the front using F11.
B: Secure them together from the front using F4 through the holes.
C: Secure M3 together with F4 from the front through the holes.
D: Secure M2 and M together using F11 from the front.(When installing M2, pay attention to its orientation; the side with the short edge is the front.)
E: Secure MR, M, and M3 together using F4 from the front.

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

NO.	PART	QTY
F10		6

Notice:
Place the door in the position shown, then use F10 to secure it.

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

NO.	PART	QTY
W1		1
W4		2

NO.	PART	QTY

F9		4

NO.	PART	QTY
W3		2

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

Notice:

Step 1: Use F9 screw rod to fix W2 and W3

Step 2: Mount W1 to W2, W3 frame (F9 screw through W1)

Step 3: Place the installed window in the window,

Step 4: Insert W4 into the screw of F9 and tighten the nut

Assembly Method

※ Assembly must be performed by two or more people. ※ To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

The following instructions explain how to adjust the installation position of the door.

To adjust the position of the door, swap the D1 on the foundation frame and the S1 on the top frame with the D1 on the bottom frame and the S3 on the upper frame.

Assembly Method

※Assembly must be performed by two or more people. ※To distinguish the orientation of components, pay attention to the position of the holes indicated in the diagram.

Then proceed with the normal installation procedure.
