## Safety Instructions

- These units should be placed on a level surface. Failure to do so can result in poor product performance or create a possible safety hazard.
- Do not stand on any part of the unit, or use it as a ladder
- Evenly distribute the weight on each level and always keep the heavier loads on the bottom.
- Do not place objects on the shelf with force. Doing so may cause the product to break and cause injury or other damage
- Do not use this unit for anything other than the manufactures intended purpose.
- A rubber hammer may be used on the beams to seat the rivets properly
- Use care when working with metal parts.

Should you have any comments, damage, missing parts, or problems with assembly of this unit please feel free to contact our customer service

# Assembly Instruction

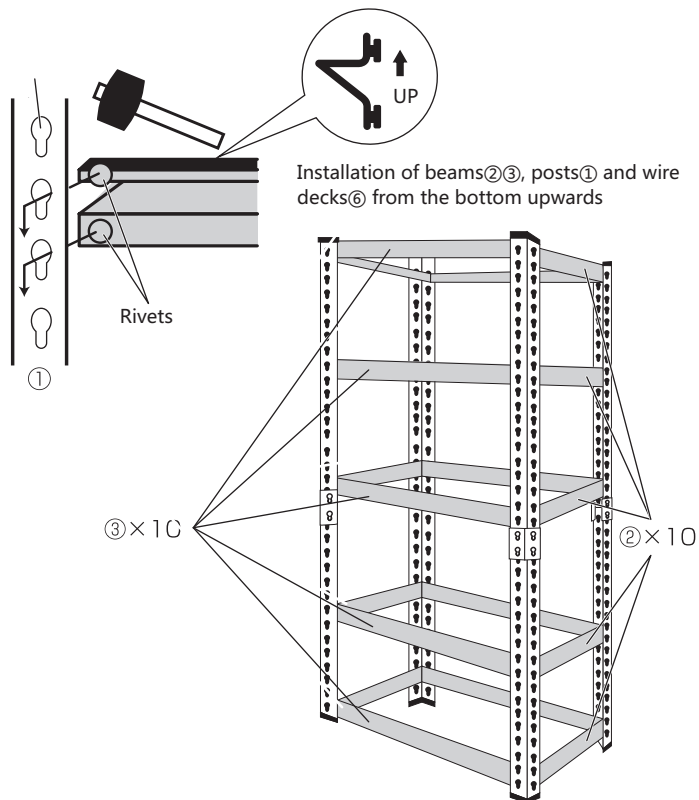

- Please assemble the shelf with care by two or more adults.
- Please assemble the shelf on a flat surface and lay out cardboard or similar material so as not to scratch the floor or other surfaces
- Please install the parts correctly.

When assembling, please pay attention to the orientation of each part.

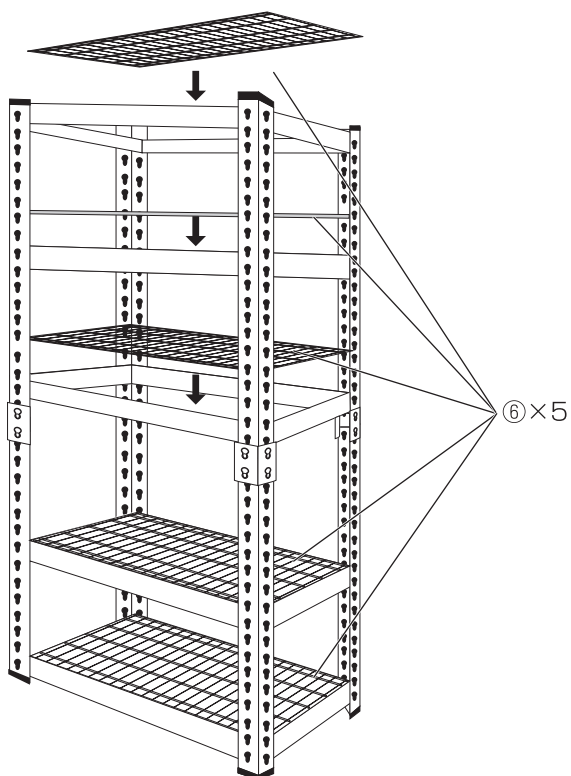

- 1** Install the post coupler④ on the post①, install the post cap⑤ on the upper and lower portions and tap it with a rubber hammer to secure it firmly in place.(X4)

- 2** Insert the rivets of the beams②③ in the hole of the post①, tap it with a rubber hammer and fix it with force

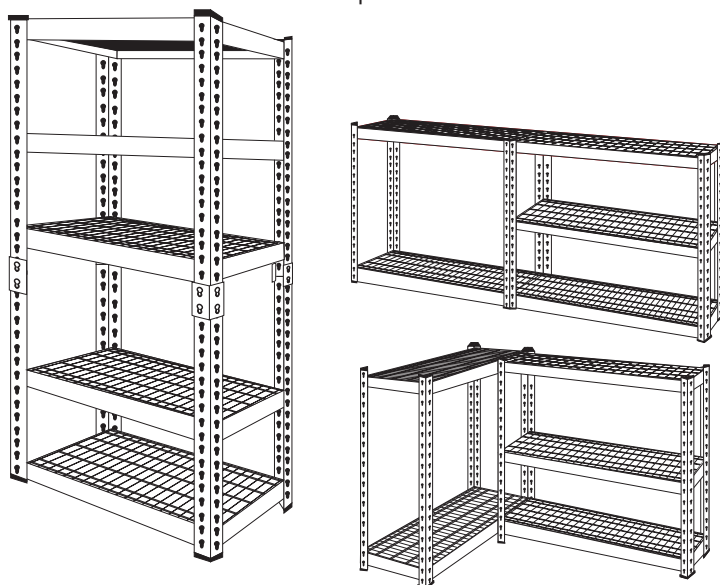

- 3** Place wire decks on the shelf supports of the long beams and short beams.

- 4**

The height can be adjusted according to the position where the beam is placed.

Can also be used in 2 parts without post coupler.

After assembly, check that the whole product is not distorted or twisted.
