

LED Wall Sconce

ASSEMBLY & INSTALLATION INSTRUCTIONS

Please read carefully and save these instructions, as you may need them at a later date.

CAUTION

Turn off the main power at the circuit breaker before installing the fixture in order to prevent possible shock.

GENERAL

All electrical connections must be in accordance with local and national electrical code (N.E.C) standards. If you are unfamiliar with proper electrical wiring connections obtain the services of a qualified electrician. Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustrations on the installation instruction.

ASSEMBLY AND INSTALLATION

1. Pull the acrylic lens out (11) from the fixture body.
2. Pull the supply wires (2&8) and the house ground wire (5) out from the outlet box (1).
3. Make the wiring connections: connect the white supply wire (2) to the white fixture wire (4); connect the black supply wire (8) to the black fixture wire (7); connect the house ground wire (5) to the fixture ground wire(6) using wire connectors (3).
4. Carefully tuck all wires back into the outlet box (1). Remove the LED PCB board by removing 4 screws (9). Locate the fixture Pan (12) over the outlet box (1). Put the mounting screws (10) through the slots on the fixture pan . Then secure the mounting screws on the fixture pan into the outlet box tightly. Reinstall the LED panel on the fixture pan again by the 4 screws (9).

5. Do not exceed the recommended wattage shown on the caution label.
6. Put the acrylic lens over the fixture body by sliding into the edge of the fixture pan (10).

INSTALLATION IS NOW COMPLETED
