Step 21

Install doors 7 and 8 by inserting the bottom hinge pin (pre-installed in the door) into the pre-drilled hole in bottom panel 5. Then press down the spring-loaded top hinge pin, align it with the pre-drilled hole in top panel 18, and release to lock the door in place.

NOTE: Make sure both the top and bottom hinge pins are fully extended and fully seated in the holes to secure the doors.

Step 24

Tools required (not included): phillips screwdriver, stud finder, tape measure, pencil, power drill and 3/16" drill bit.

Now, follow the instructions printed on the plastic bag containing the tipping restraint hardware to attach the tip-over restraints to the unit and the wall.

NOTE: The tipping restraint hardware included is for wooden stud wall construction. It must be attached to a wall stud depending upon your wall construction, and different anchor hardware maybe required. Please contact your local hardware store for assistance.

Young children can be seriously injured by tipping furniture, so you must install the tipping restraint hardware with the unit to prevent the unit from tipping, in case of causing any accidents or damage.

The tipping restraints are intended only as a deterrent, they are not a substitute for proper adult supervision.

The tipping restraints are not earthquake restraints. if you wish to add the extra security of earthquake restraints, they must be purchased and installed separately.
