

# Owner Manual

## Daily Care

- Dust the mango-wood surface with a soft, dry microfiber cloth.
- Use felt-bottom coasters and placemats to prevent water rings and heat damage.

## Spill Management

- Blot liquids immediately with a clean, absorbent cloth—never rub.
- Sticky residues: wipe with a cloth dampened in mild dish-soap solution, then dry thoroughly.

## Wood Conditioning (Every 6–12 Months)

- Apply a clear, food-safe furniture oil or wax to nourish and seal the grain.
- Follow product directions; buff off excess to maintain the low-sheen finish.

## Hardware Check

- Retighten all leg bolts one month after assembly, then yearly.
- Replace nylon floor glides if they show wear to protect floors.

## Environment & Placement

- Maintain indoor humidity between **40–60 %** to minimise wood movement.
- Avoid prolonged direct sunlight or heat vents that may cause fading or cracking.
