Performance Features

Cooling Gel Comfort

Gel-infused memory foam promotes airflow and helps dissipate body heat for a cooler sleep surface.

Pressure Relief

Comfort layers contour around the back, shoulders, and hips while maintaining a medium-firm feel.

Motion Isolation

Individually wrapped coils move independently to help reduce partner disturbance.

Reinforced Edge Support

Double-reinforced edge construction improves perimeter stability and usable sleep space.

* Size/profile combinations are based on the referenced listing family and may change over time.
