

这个是背部过滤的安装视频

This is the installation video of the back filter.

Now, let's take a video of the installation of this fish tank.

Ensure the accessories are complete.
Place the water pump on the right side
of the back.

Install the outlet pipe fitting and tighten it.

Place the filtering material in position, lower the bacteria house to the lower layer, and place cotton on the upper layer.

Filtering material placement example diagram.

我们会有配两个卡子
We will have it with two clips.

灯管那个就是直接放到这上面的
The lamp tube is put directly on this one.

就把这个白色的棉不要取掉就可以了
Just don't remove this white cotton.

Place the fluorescent tube above the aquarium, and it will come with two clamps. Remove the white foam on the fluorescent tube.

Tighten the 6 bar columns.

拧好之后就直接上面

After screwing, it will be
directly above.

Just put the bar glass on it directly
Installation completed.
