

Model:48530

①

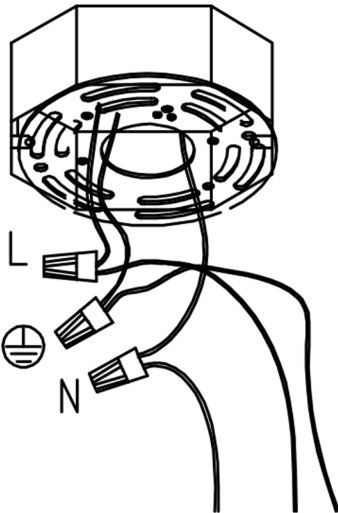

1.Pass the wire through the metal tube, the hanging chain, and the lamp base. Then, screw the metal tube onto the lamp body clockwise. Finally, secure the lamp base, hanging chain, and lamp body together using the quick link.

②

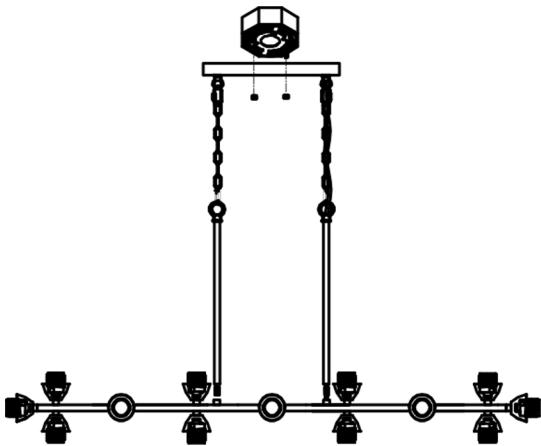

2.Use 2 long screws to install the hanging board on the junction box.

③

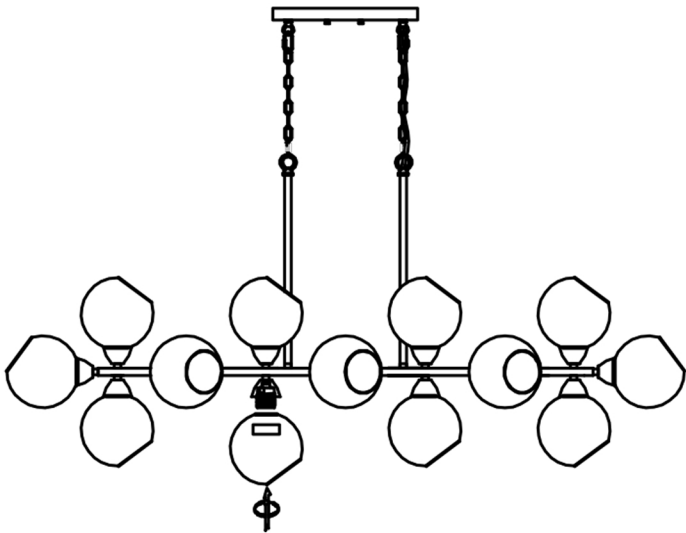

3.To wire the device, connect the three corresponding wires using wiring caps - black to black, white to white, and ground to ground, ensuring each connection is fully secured by tightening the connectors. Verify that no bare copper wire remains exposed after connection, as this could lead to electric shock. Always remember that 'L' denotes the live wire while 'N' identifies the neutral wire in this configuration.

④

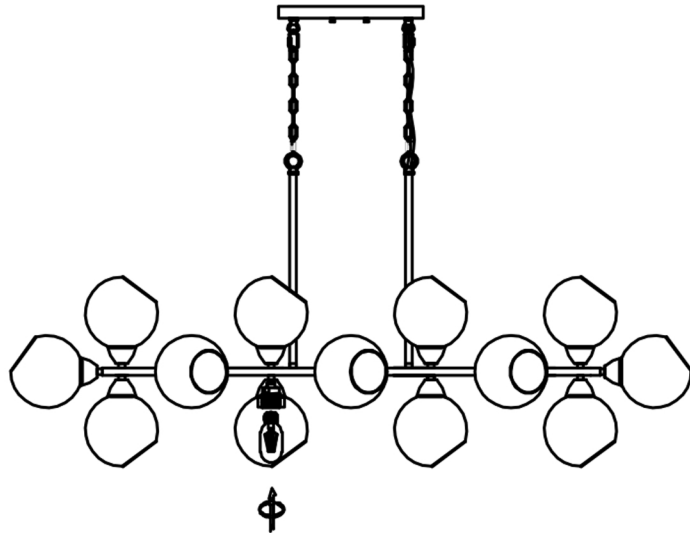

4.Install the lamp body on the hanging board and tighten them with the short screws.

⑤

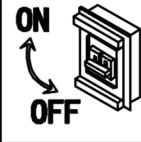

5.Screw the lampshade to the lamp body with the Lamp holder rings.

⑥

6.Install the bulbs. Close the switch and check that the light is on normally. (Bulbs not included)
