STEP 5

4x5 2xJ 1x8

This forms the next level. Once completed, place the cover (Y) over the frame and attach.

STEP 6

In order to have the frame connected you will need to assemble the frame by pushing downward while connecting two rods at a time, giving it an extra force (when frame is complete repeat from all angles, as picture shown). This will result in a tighter and smaller frame enabling the greenhouse cover to slide on easily.

Anchor kit Assembly Instructions

Hammer the anchors into the soil, placing them on all four sides of the greenhouse.

Step 2

Connect the top end of the rope into the strap on the top of the greenhouse for all 4 sides as image shown.

Step 3

Take the other end of the rope and pass it through the bended side of anchor as shown in figure. Repeat the step for all 4 sides.
