## Guidelines for Use

The brand's timepieces are full-time, power-saving, and ultra-quiet, with a lifespan of about 10-15 years. The lifespan may be shortened or extended depending on the method of use, battery, and environmental factors, so please take care of it.

### Main Technical Indicators:

The main technical indicators of this product are certified according to the product CE testing and ROHS standards.

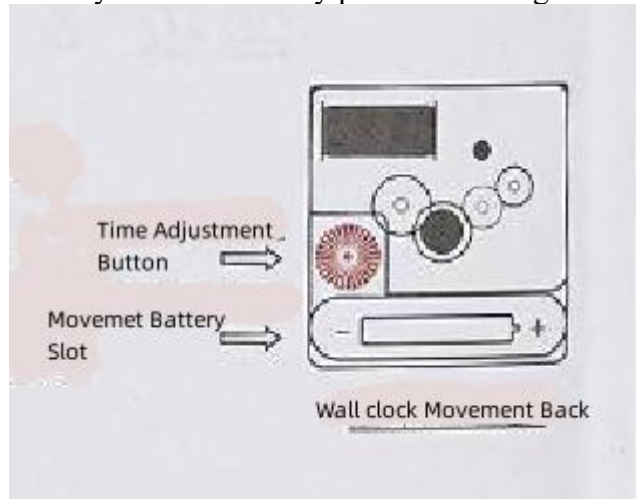

\*Operating Temperature:  $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$

\*Average Power Consumption:  $<150 \sim 170\text{A At } 1.5\text{V DC}$

\*Average Day Difference:  $-0.8 \sim +1.2 \text{ Sec/Day}$

### Wall Clock Installation Structure Instructions:

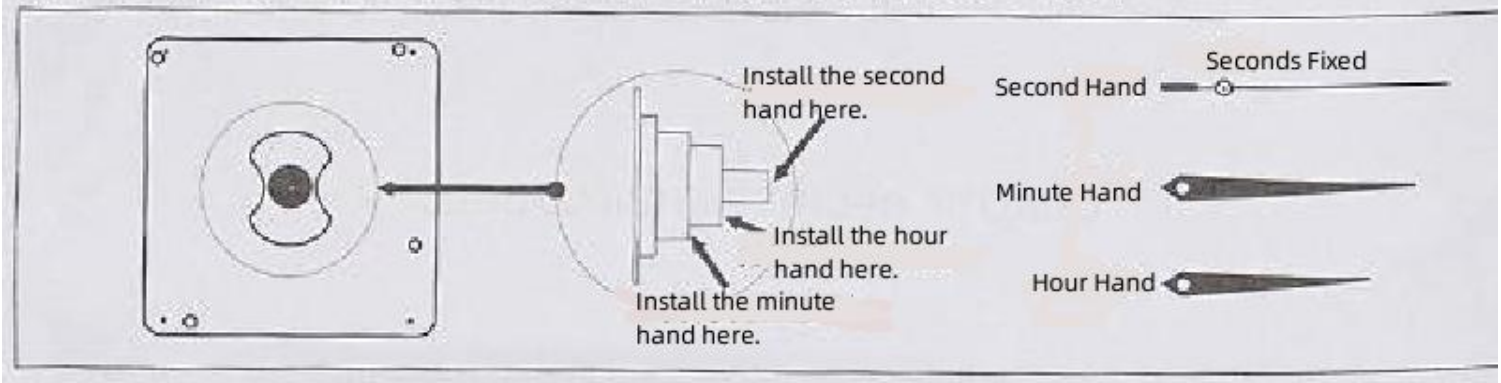

1. The wall clock is basically shipped as a whole, only needing a simple installation. After installation, choose a location to nail the non-marking nails and align the hook hole on the back of the clock with the hook and hang it properly.
2. Please use AA carbon batteries and ensure that the positive and negative poles of the battery are installed correctly
3. If you encounter any problems during installation and use, please contact our customer service staff.

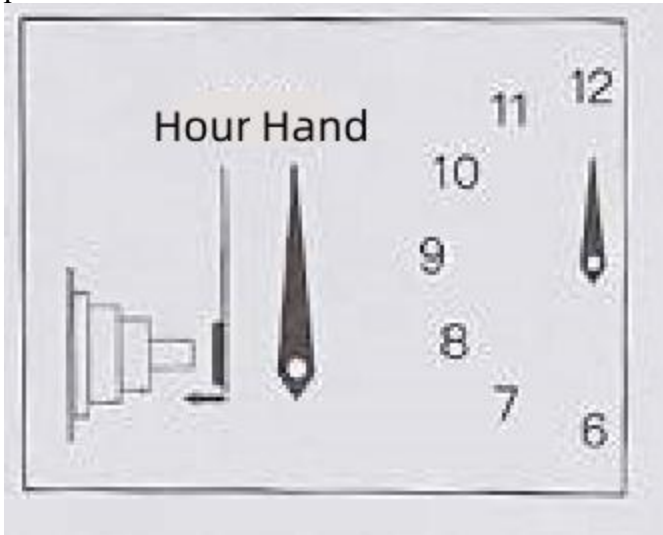

### Instructions for Reinstalling the Hand:

If you find that the time is not accurate after receiving the wall clock, it may be because the courier has been bumped on the road, and the hands are pressed or loosened, just reinstall the hands, the steps and methods are as follows:

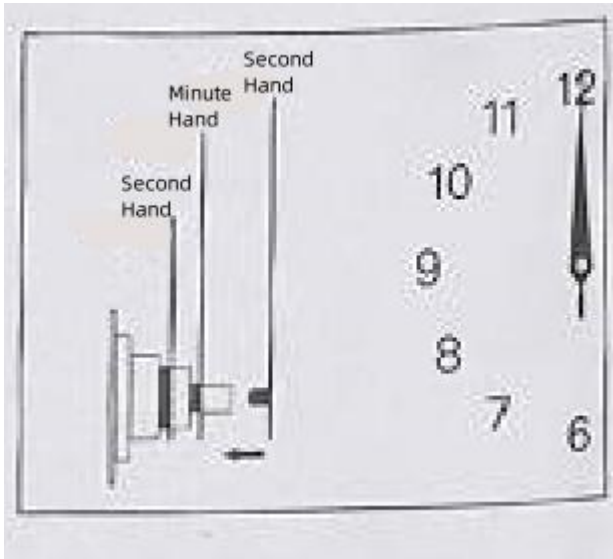

(1) Remove the battery, put the clock face up and pinch the root of the hands to remove the hands one by one.

(2) Pinch the root of the hour hand (shortest), align the tip of the hour hand with the 12 o'clock direction, and gently press the hand onto the movement shaft.

(3) Similarly, install the minute hand (medium-length) and second hand in turn, and align the tips of the hands with the 12 o'clock direction.

## Peacock Wall Clock Installation Method:

### Installation Instructions for the Peacock Spreading its Tail:

To facilitate the transportation, the peacock head and the clock body in the shipment are separate, when you receive the good, only need three simple steps to complete the installation, steps are as follows:

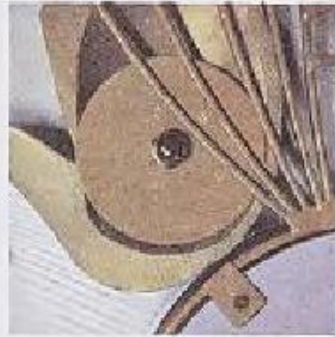

### Installation Instructions for Double-headed Peacock:

To minimize the wear and tear during transportation, the right-wing head and the left are separated, and you need to follow the steps below to install the received good (such as the picture):

(1) Take out all the accessories, flip the wall clock to the back, adjust to the right angle, and then use the screws to fix the right wing.

(2) Align the peacock heads on both sides with the installation holes and tighten the screws.

(3) Adjust to the right time and hang it on the wall.

### **Installation Tips:**

1. If you think a nail hanging is not stable, it is recommended that you use a nail at the intersection of the wings on each of the 2 sides to strengthen the fixing;
2. Because the body of the clock is made of iron and the feathers have edges and corners, please be sure to install it in a place that children and the elderly cannot touch to prevent collisions from causing the clock to fall off;
