Name and function of components

Function

14

15

16

17

18

• This product is designed with a set of intelligent 4D massage hand that can walk up and down, front and rear telescopic, and silent design

• The design has automatic detection and micro-adjustment function of the shoulder position: the human body curve and the automatic detection function of the massage finger pressure point automatically adjust the amount of the front and rear movement of the manipulator according to the detected human body curve and the massage finger pressure point, so that the massage is more humanized and scientific.

· Features automatic massage function: six kinds of automatic massage functions such as Shujing Active, Beautiful Butt Shaped, Sleeping Massage, Neck and Shoulder Relaxation, Back Stretching and Breathing.

• There are three special massage functions: Blu-ray bath, fragrant health, music SPA.

• There are three kinds of custom storage functions: Custom Storage I, Custom Storage II, Custom Storage III.

• The upper body manually selects the massage function: there are five kinds of massage position selections such as full stroke, partial, fixed point, upper back and lower back; shoulder lifting, kneading, tapping, shiatsu, kneading and tapping synchronization and 4D six massage techniques; The massage technique has five speeds that can be adjusted; in the state of tapping and shiatsu massage, the robot massage ball has five widths to adjust.

•With air pressure massage function: arm air pressure massage function (built-in 8 airbags), upper arm air pressure massage function (built-in 4 airbags), back air pressure massage function (built-in 4 airbags), leg air pressure massage function (built-in 22 Airbag), foot air pressure massage function (built-in 18 capsules), air pressure massage function on both sides of the seat cushion (12 airbags built-in), seat cushion air pressure massage function (built-in 4 airbags), and third-speed air pressure intensity adjustment.

• It features back heat therapy and leg heat therapy: carbon fiber is used as a far infrared heat source.

• The backrest frame is laid down with slide rail technology to keep the backrest away from the wall at all times, saving space.

· It has a waist swing massage function: it uses the waist pressure to swing around to form a twist massage function, which relieves sedentary and causes waist muscle tension.

· Shortcut button on the right armrest: open button, backrest and calf position adjustment button, heating button, star top button, aroma button, zero gravity button, calf extension button, calf shortening button, air pressure mode button, automatic mode button, etc. hot button.

· It has two kinds of adjustment functions: lower leg lifting adjustment, linkage lifting adjustment, zero gravity I or zero gravity II.

Function

- The foot is equipped with a foot roller massage function. The two sets of rollers roll and scrape the foot and the foot, and the heel has a number of massage bumps to massage the heel.
- The calf is equipped with the function of automatically detecting the length of the foot. When the calf is raised or lowered to a suitable angle, the calf will detect the length of the foot and detect the most comfortable massage part.
- The backrest guide adopts the curved guide rail technology, which fully fits the curve of the back of the human body, and can enjoy the body massage from the head to the thigh.
- · There are 8 natural energy magnets in the leg airbag belt.
- · Configure the LED mood lights on the left and right upper arms.
- ·A USB charging function is provided on the right armrest.
- · It has a space capsule cover that rotates up and down.
- · It features a blue sky treatment for starry sky.
- ·Aromatherapy function
- · Configure TFT color screen hand controller
- Smart terminal devices (such as mobile phones or tablets) can use the APP software to control the massage chair via Bluetooth.
- Built-in 3D digital audio on the upper arm, Bluetooth music function, you can also connect your favorite music through Bluetooth (Bluetooth name: IMCM-XXXX) via smart device (such as mobile phone or tablet).
- The headrest cushion is double-layered, and the number of layers can be determined according to your needs, so as to reduce the neck and shoulder massage, which is suitable for different people to choose.

- During the massage process, press the power switch button to immediately turn off all massage functions, the back of the chair and the foot pad are reset, the massage time is up, and all massage functions are immediately turned off, and the back and foot pads are not reset.
- Cut off the power supply of the whole machine, the figure (schematic diagram of the whole machine power cut).

- 1 Schematic diagram of the whole machine power turning off.
- 2 Schematic diagram of unplugging the whole machine wiring.
- 3 Schematic diagram of unplugging the power plug.

Method of usage

4.Fourth, support Apple and Android tablet system, operation control massage chair

Application interface

- 5.Calf adjustment
- 6.Zero gravity
- 7.Intensity adjustment
- 8.Start/Pause button

1). Preparation before use

- 01) Installer download and installation
- Download the installer by the installer provided by the installer or by the network download address provided by the dealer.
- Connect the tablet to the computer with a data cable, and install the installer to the tablet via tablet software (such as iTunes for Apple, software for software such as Android). After the installation is successful, the application will be displayed in the app list of the tablet.

2). Bluetooth connection

- Turn on the power switch of the massage chair and automatically turn on the Bluetooth function.
- From the tablet home screen, open the application list and select Settings to open the settings screen.
- Turn on the Bluetooth function → select Bluetooth settings → click to find the accessory device "Bluetooth name: IMCM-XXXX" icon, click the "IMCM-XXXX" icon to pair the tablet Bluetooth module with the massage chair Bluetooth module (the pairing password is "0000")), after successful pairing, click the "IMCM-XXXX" icon to connect the Bluetooth module of the tablet to the Bluetooth module of the massage chair. After the connection is successful, the application can be used to control the massage chair.

3).Bluetooth module abnormality problem and solution

- If the Bluetooth pairing is successful, if you can't connect with the Bluetooth module of the massage chair, please try to cancel the Bluetooth pairing, and then turn off the power of the massage chair and then turn on the power of the massage chair again, then repeat the Bluetooth pairing according to the above Bluetooth connection method.
- The Bluetooth display has been connected successfully, but the massage chair cannot be controlled normally after entering the application, or the message prompt bar displays "Bluetooth not connected". This status is abnormal for the Bluetooth module. You need to exit the application to reconnect the Bluetooth module, or turn off the massage. After the chair is powered on and then the power of the massage chair is turned back on, the Bluetooth pairing and connection are re-established according to the above Bluetooth connection method.

5. Five, tablet system operation, turn on the whole machine power

• After confirming that the massage chair power switch is off, connect one end of the power cord to the massage chair, and then plug the power cord into a well-grounded power outlet. Then switch the massage chair power switch to the on state.

Method of usage

6.Sixth, tablet computer massage function control operation 1).Start the massage

- From the tablet home screen, open the application list and click the app "orall" icon to launch the massage chair control app.
- After launching the application, enter the startup interface, click " 😃 " to start the massage, while the backrest keeps the default position and the calf is slightly raised.

• Enter the waiting to select the automatic mode, select an automatic mode and start the detection. If the automatic mode is not selected within 5 minutes, the massage chair will automatically shut down. Note: Shujing Active only detects the height of the shoulder position, and other automatic modes detect the full body shape and shoulder height.

Boot interface

Please select automatic mode

• When you select any of the automatic modes, the backrest and calf position will be adjusted to the set angle.

• After adjusting the angle, the massage chair automatically performs the shoulder position and body type detection (Note: Shujing Active only detects the shoulder position, other modes are full body type detection and shoulder position detection), waiting for the test to be completed. If you press the " Y button, skip the shoulder position and body shape detection steps and directly turn on the default value to start the massage.

Lying angle adjustment display interface

Shoulder position and massage finger pressure detection interface

01). Shoulder position adjustment

- Automatically perform human shoulder position and massage finger pressure point detection, waiting for the test to be completed.
- After the test is completed, enter the shoulder massage position adjustment interface and make a "DiDi..." prompt tone. If it differs from the actual shoulder position, you can adjust it to the appropriate position by pressing the "Up" or "Down" button. The shoulder position is adjustable in 11 steps. With no shoulder position adjustment within 10 seconds, the massage function is automatically entered. If the shoulder position is not detected, the default shoulder position height is massaged.

Shoulder position adjustment button	Function description
	Adjustment of shoulder massage position
	Adjustment under the shoulder massage position

• With Bluetooth-enabled audio source devices (such as mobile phones, MID tablets, etc.) paired with the Bluetooth module of the massage chair, the music played by the audio source device can be wirelessly transmitted to the massage chair audio system for music playback via Bluetooth wireless.

7.Seven, tablet system operation, turn off the power, end the massage

When the massage function is on, click the massage button on the massage information display interface to immediately turn off all massage functions.
Cut off the power supply of the whole machine, the figure (schematic diagram of the whole machine power cut).

- **1** Schematic diagram of the whole machine power turning off.
- 2 Schematic diagram of unplugging the whole machine wiring.
- 3 Schematic diagram of unplugging the power plug.

Switch the massage chair power switch to the off state, and then unplug the power cord from the power outlet.

8.Eight, handrail installation instructions

• Find the connecting plug corresponding to the armrest from the bottom of the frame and pierce it from the middle of the armrest steel frame (Figure 1).

• After inserting the connecting plug from the middle of the armrest steel frame, corresponding to each pair of wiring plugs (Figure 2).

• The connector from the bottom of the frame is connected to the armrest connector firmly, and the air pipe connector is also inserted into place (Fig. 3).

• After the connector is connected, gently push the top of the frame into the bottom of the frame with the hand fixed on the steel frame, taking care to avoid the pipe collapse (Figure 4).

• As shown in the figure, the three hooks on the handrail are to be hooked to the steel pipe of the handrail steel frame (Fig. 5).

• Hold the front and rear ends of the armrests with both hands. Before the armrests are low and high, first hook the front end of the armrests to the front end of the armrest steel frame. (Check if the connecting cable is inserted into the lower part of the armrest frame to avoid jamming.) Then hook the hooks under the armrests to the steel. The frame presses the rear end of the armrest down and presses the upper two hooks into the steel frame (Fig. 6).

Method of usage

After the armrest is placed on the fixed steel frame, press the hands together from the front and rear of the handrail so that the three hooks of the handrail are fixed on the steel frame, and gently shake the handrail to check whether it is hooked (Fig. 7).
Locate the mounting hole on the front of the fixed steel frame as shown in the figure. Screw the hexagon socket screw into the screw with the Allen button (Figure 8).

• Locate the mounting hole on the rear of the fixed steel frame as shown in the figure. Screw the hexagon socket screw into the inner arm of the fixed hexagonal wrench and fix it. The installation steps are the same (Figure 9).

Figure 9

9.Nine, calf installation instructions

- 1. Cut the connecting wire and the air pipe tie fixed on the front sealing plate first.
- 2. Connect the connecting wire and the air pipe and the leg joint in the hole of the front sealing plate, and confirm whether the docking is in place, and then insert the docking cable and the air pipe inward from the front sealing plate hole, and insert it under the frame, and pay attention to Avoid obstruction of the trachea when inserted.

- 3.Insert the rotating inner sleeve and the rotating outer sleeve into the left side of the calf and the right side of the lower leg (note: the large step must face inward).
- 4.Open the calf support hinge cover on the left and right mounts of the massage chair.

Method of usage

- 5. Then hang the lower leg (left and right shaft) into the frame support hinge plate (Figure 5).
- 6. Cover the rotating shaft cover, press the calf to rotate the outer sleeve, and then use the 4# hex wrench provided to tighten 2 M5×14-12.9 black zinc environmental protection hexagon socket head cap screws and a 6×12× 1.5 Black zinc environmental protection flat pad locks the calf support rotating cover and the calf is installed (Fig. 6).

7.After the screw is locked, the rear slot of the calf cover is snapped into the pin shaft, and then the front end of the lower leg cover is pressed down and the rotating shaft cover is pressed. completely parallel and parallel, then use the M4 screw to lock the calf rotating shaft cover and the calf is installed.

10.Ten, aromatherapy installation instructions

• Rotate the capsule cover to the back of the massage chair. You can see the aromatherapy device on the right side of the massage chair (Figure 1). • Rotate the aromatherapy holder knob to the unlock position and remove the empty aroma stick (Figure 2).

- · After removing the empty aroma stick, attach the new aroma stick to the aroma holder. Then align the arrow on the aroma holder with the unlocked position on the upper arm trim and load the aroma stick (see Figure 3).
- · Rotate the aromatherapy holder to the position of the lock closure mark, you can lock it, and the aroma stick is installed (Figure 4)

Method of usage

11.Head cushion and backrest pad's dismounting and use manual

• Using head cushions can reduce the kneading massage intensity on neck and shoulder, according to your needs to decide whether the head cushions isneeded (recommend head cushions). Backrest cushion and backrest connected by zipper (1), head cushions and backrest pad connected by thread gluing (2).

12.Floor protection

 \cdot Put the heavy massage chairs on the wood floor for a may damage the floor, so please place a carpet or other object to avoid this damage.

Caution: Do not move the chairs with its wheels on wood floor, rough ground or in a narrow space. Two people are required to lift the chair. During the lifting period, take the calf rest end sealing plate and backrest cover grooves as the force-bearing point(Please do not lift armrest directly.)

13.Method of movement

•When moving, first make sure all the wires are pulled out of the massage chair. On the left and right sides of the massage chair, hold the lower edge of the armrest with both hands, and then lift the massage chair upwards with force. Lift the massage chair to the appropriate position and gently lower the massage chair. Pay attention to the position of the foot when putting down the massage chair to avoid being pressed against the foot by the massage chair

Note: Be sure to turn off the power switch and unplug the power cord and the hand controller cable while moving.
