

User Manual

Welcome:

Thanks for purchasing this **Twin Spotlight Outdoor**. Please read this user manual carefully before use.

Packaging Lists:

Upon opening the package, please check for the following items:

- * 2 x Spotlight Heads
- * 1 x Panel
- * 3 x Ground Stakes
- * 1 x Screw Kit
- * 1 x Screw Wrench
- * 1 x User Manual

Specifications:

- * Product Type: Dual Head Lights
- * Panel: DC 6V/3.2W, Polysilicon
- * LED Power: 1Wx2PCS
- * LED Color: White
- * Material: Cast Aluminum and ABS
- * Color temperature: 6500-7000K
- * Battery Type: DC 3.7V*2200mAh Lithium Battery
- * Charging Time: Approx. 6-8Hours
- * Working Time: Approx.8-9 Hours
- * IP Rating: IP65 Waterproof
- * Light Range: 15M/49FT
- * Cable Length: 3M/9.84FT

Description:

The lighting is all the rage, which reduces electricity charge and avoids complex line engineering. Come with sensitive light sensor, auto on at night and off during the day. IP65 Waterproof and durable materials are optimal for free outdoor use even in rainy, snowy or other weather conditions.

Method Of Operation:

1. Turn on the switch on the back of the panel and set the panel facing up for sunlight exposure to charge the built -in battery.
2. Drive the stake into the ground. Put the light wherever you want.
3. The light will work automatically in the darkness if the batteries have enough power.

Important Notice:

1. As the power of the panel is depended on the sunlight, the LED lighting time is affected by weather, seasons, places, etc..
2. Make sure that the panel is not sheltered from the sun, or the light could not be charged well.
3. The battery can only be charged when the switch on the back of the panel is turned ON.
4. Make the panel face up for protection against rain. Keep the lamp holder away from the water.
5. Don't strike the product, so as not to cause irreversible damage.
6. The stake is so sharp that you must be careful when using it. And don't let children play with it.
7. In order to extend the lifespan of the light, please place it in a place with sufficient sunlight before the first use and illuminate more than 24Hrs to fully charged. Thanks
