1.Remove the fixing screws (B) from the fixture body (C) to separate the trapezoidal top cover (A) from the fixture body (C).
2.Install the E26 Bulb(bulb is not included).
3.Secure the trapezoidal top cover (A) to the fixture body (C) with the two fixing screws (B).
4.Pull out the wires and grounding wire from the outlet box. Make wire connections using the wire nuts, as follows:
---Connect the hot wire(usually black insulation)from the fixture to the black wire from the power source.
---Connect the neutral wire(usually white insulation)from the fixture to the white wire from the power source.
---Attach the fixture grounding wire (usually green insulation or bare wire)to the mounting strap with the green grounding screw.Then connect it to the house grounding wire with the wire nut. Carefully put the wires back into the outlet box.
5.Use three mounting screws to secure the Post Cup to the cylindrical base.

Turn on the power at fuse or circuit box.
