

INSTALLATION MANUAL

METAL FRAME MIRROR

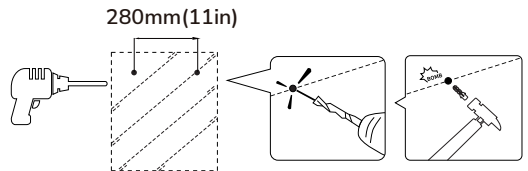

Thank you for shopping with us! We hope that our products have added a touch of brightness to your life. If you need any assistance, please don't hesitate to reach out. Our dedicated team is available 24/7 to ensure your satisfaction.

ACCESSORIES & TOOLS REQUIRED

INSTRUCTIONS

1. Use an electric drill to punch 2 holes at the proper height, and then apply wall anchors with a hammer.

Thickness of Wall

> 16mm

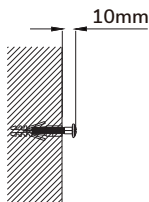

Recommended Drill Bit

1/4" (6mm) drill bit, drilling depth in 1 31/32" (50mm)

Note: Please wear goggles and pay attention to safety.

2. Install the screws and leave a 10mm gap between screw head and the wall.

3. Align the mounting hooks on the back to the screw heads and hang the mirror. Ensure that the mirror hangs securely before loosening your grip.
