Geometric Progression 6

D1214S24264-2264

Geometric Motion VI is part of a series of eight geometric drawings that invite the viewer to experience the elegance of minimalist design. These understated compositions showcase line drawing techniques that explore a variety of geometric shapes that highlight the fundamental importance of the line in art. In

Geometric Motion 6, a more complex shape takes form and features bold dark lines that are complemented by more subtle marks. The series is reminiscent of Josef Alber's geometric line drawings of the 1950s. Part of ART by TA, Geometric Motion 6 is an exclusive and original work of art.

► Frame Width: 1.625 in
