BEFORE STARTING ASSEMBLY

① Please check all parts and components to ensure that there are no damages or missing items BEFORE starting the construction of the product.

② For ease of construction, you may need a Power Drill (Cordless, Variable Speed).

③ It would be much easier to assemble the product with two or more people.

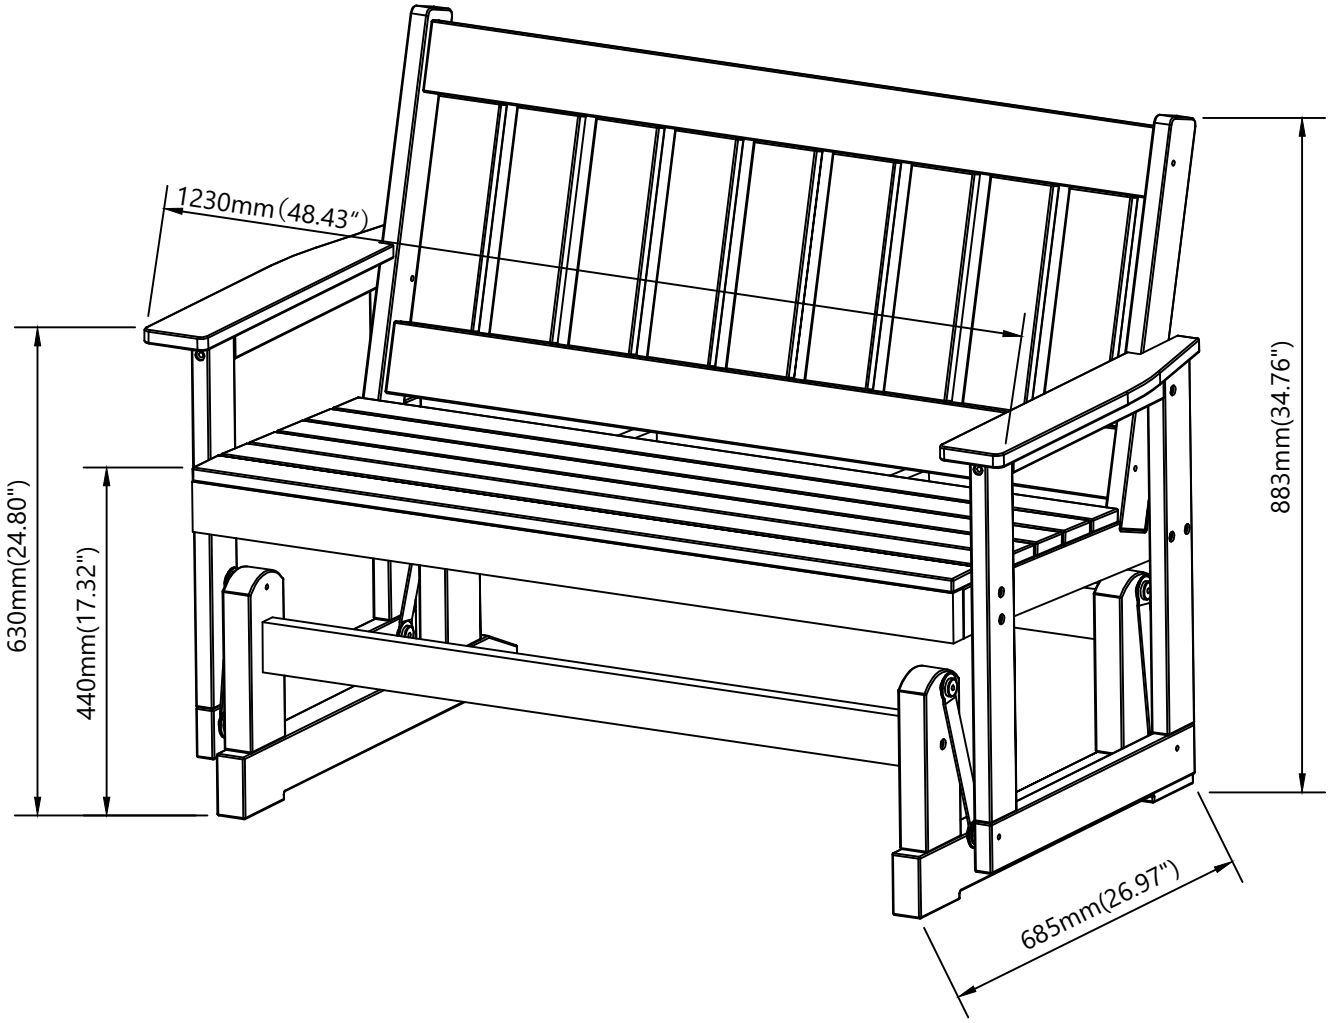

④ Some parts have metal edges. Please be careful when handling components.

⑤ Cleaning tips: For a quick clean, simply wipe with soap and water; for a deep clean, use a clean cloth to apply a solution of 1/3 bleach and 2/3 water to the lumber, let it sit for a few minutes (this won't affect the color), then loosen dirt and debris in surface grooves with a soft-bristle brush and rinse with a hose.

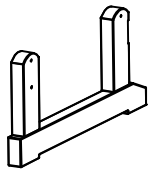

IMPORTANT: Please contact Customer Service if you encounter any issues or find any missing parts.
