

Component parts list

NO.	PART NAME
1	Faucet spray head
2	Handle
3	Body
4	Rubber washer
5	Metal gasket
6	Lock nut
7	Screw
8	M8 waterproof cable
9	Pull-out hose
10	Adapter
11	Red hot hose
12	Blue cold hose
13	Gravity ball
14	Hydroelectric generator
15	Garden Hose Adapter

3/4" Female

INSTALLATION GUIDE

1. Customer Service

Thank you for allowing us to offer you our best customer service, please have any problem to contact us the email we will assist you to solve all the problems, we're looking forward to serving you again.

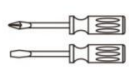

2. Technical Parameters

Recommend water pressure	0.5bars≤P≤5bar
Recommend hot water temperature	50-60°C
Highest hot water temperature	80°C
Install aperture	35mm
Installation thickness max	40mm

3. Required tools

Adjustable wrench

screwdriver

gloves

4. Notice

1. The inlet pipe cannot be bent excessively. (Figure 1)
2. The inlet pipe is not twisted excessively. (Figure 2)
3. The maximum thickness of the mounting plate is 40mm. (Figure 3)
4. Left is hot, right is cold. (Figure 4)

Figure 1

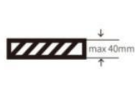

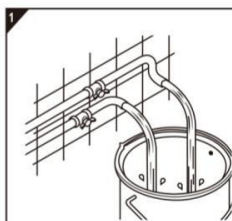

Figure 3

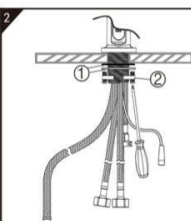

Figure 4

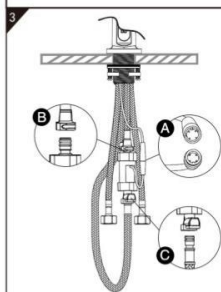

5. Installation Steps

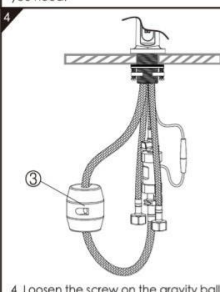

1. Please flush the water pipe for at least 2 minutes before installation, ensure that no impurities interference, and supplies hot and cold water from angle valve.

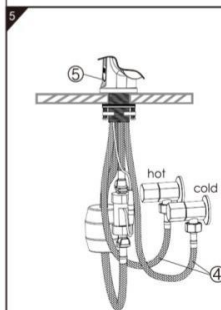

2. Pass through the basin installation hole, followed by installation: gasket (1) and copper nut (2), adjust the direction of the faucet, and then tighten it, tighten the screw with screwdriver to reinforce it if you need.

3. Finish connecting the hydroelectric generator in the order of A, B and C.

4. Loosen the screw on the gravity ball with a screwdriver, separate the gravity ball (3), combine the separated gravity ball at the bottom of the pull tube and tighten the screws.

5. Connect the inlet pipe (1) to the angle valve, open the angle valve to check whether is leaking between the inlet pipe (1) and the angle valve, the inlet pipe (1) and the faucet (5) connection, the installation is completed.

6. Operation and Maintenance

Operation and Maintenance

Modern bathroom faucets and shower products are made of different materials to meet the design and functional requirements of the market. In order to avoid damage to the product, it is necessary to properly maintain them.

Optimum Effect:

1. If necessary, clean your faucet to prevent the accumulation of dirt.
2. Choose a cleaning agent designed specifically for the product type.
3. Don't use the following detergent to clean your product:
 - Avoid contact with any acid-containing cleaning agents, polish abrasives or rough agent.
 - Frosted powder, mat or brush.
 - Steam cleaner.
 - No cleaning effect of cleaning agent.
4. Use cleaning agent full according to the manufacturer's instructions completely.
5. Do not mix detergent, except under the guidance of the manufacturer.
6. Do not spray the cleaner directly on the product because the drip will enter the gap and cause damage. When using a spray cleaner, spray the detergent onto a soft cloth or sponge.
7. Wash faucet with clean water, and wipe with soft cloth.

7. Notice

1. Soap and shampoo residue can cause damage to the goods. Clean with water after use.
2. Pots, files, hose residues will damage the faucet and immediately clean the detergent residue on the shower.
3. Improper cleaning or inappropriate detergent results in product damage not covered by the warranty.
4. If a part of the product is damaged, replace it because there is a risk of injury.

8. Warranty

Consumer limited warranty

The product has been manufactured and tested by us to reach the highest quality standard.

This warranty is limited to the consumer which has been purchased and safety use the product.

Applicable Warranty

This warranty applies only to the original purchaser and this warranty is non-transferable.

Warranty Content

Only guarantee the products manufactured by our company. A warranty that guarantees a defect in material or workmanship as follows:
