Bonus Feature

Now you have successfully completed the assembly of each module. Based on the number of modules you purchased, you may remix your Delaney in multiple configurations. In the diagrams on following pages, there are several configurations for your reference. After you decide which configuration you love the most, you may connect the chairs with Metal Connectors. In addition to non-slip legs, these Metal Connectors are provided to further help prevent the chairs from sliding apart.

Step 1: Put the chairs side by side, with the base of the chair facing you.

Step 2: Attach the Metal Connectors by screwing on the legs firmly. You may have a few extra Metal Connectors left over. They are included in case you want to connect additional modules in the future. We recommend storing them in the little zip-top bag in case you decide to expand your Delaney later.

Note: Ottoman is a standalone piece and cannot be attached to any chair with Metal Connectors.
