Notes

Measure your actual product for roughing-in details.

Install this product according to the installation guide. Ensure that the bath, user interface, amplifier, and transducers are functional before completing the installation.

Control amplifier fits 16" (406 mm) center studs. 25' (7.6 m) cables are included.

Locate the bath within 24" (610 mm) of a GFCI-protected 120 V, 15 A grounded electrical outlet. A second grounded outlet within the wall framing must be within 24" (610 mm) of the planned control amplifier. One electrical service may be used for the entire bath and related electrical components.

Hot water supply should be 70% of capacity or greater. Installations will vary.
