

Product User Guide

Model: Lucia Executive Chair

Seat Height Adjustment:

To increase the seat height, lift the circled lever whilst no weight is being applied to the seat.

To lower the seat height, lift the circled lever whilst weight is applied.

Lock Tilt:

To unlock the tilt function, pull the circled lever up and apply pressure to the backrest. While in this 'free float' position the chair will tilt freely when weight is applied to the backrest.

To lock the tilt function, keep the chair upright and push the lever back .

(Please note this will only lock while the chair is in a fully upright position)
