## ATTENTION

Care **MUST** be taken when handling various pieces of your building since many contain sharp edges.

**Do NOT** attempt to assemble your building before double checking that you have all parts indicated in the parts lists. Any building left partially assembled may be seriously damaged by even light winds.

**Do NOT** attempt to assemble your building on a windy day, the large panels can catch the wind like a “sail”, making construction difficult and unsafe. **Watch the weather closely.** Keep children and pets away from the worksite during construction and until the building is completely assembled. This will help avoid distractions and any accidents which may occur. Never concentrate your weight on the roof of the building.

Before assembling any parts, your base should be constructed and an anchoring system should be ready to use. Your building must be anchored to prevent wind damage.

## ASSEMBLY

The best location is a level area with good drainage.

Allow enough space outside the building to be able to access the roof with a ladder.

**USE TEAMWORK:** Two or more people are required to assemble your building.

## CARE & MAINTENANCE

**Do NOT** use power washing to clean your shed.

Combustibles and corrosives must be stored in air tight containers designed for chemical and/or combustible storage.

## Rust Protection Precautions

Avoid nicking or scraping the coating surface, inside and out.

**PLEASE KEEP THIS INSTRUCTION FOR FUTURE REFERENCE.**
