

# INSTRUCTIONS FOR OPENING YOUR MATTRESS

**DO NOT** proceed without ensuring sufficient space for the mattress to unroll!

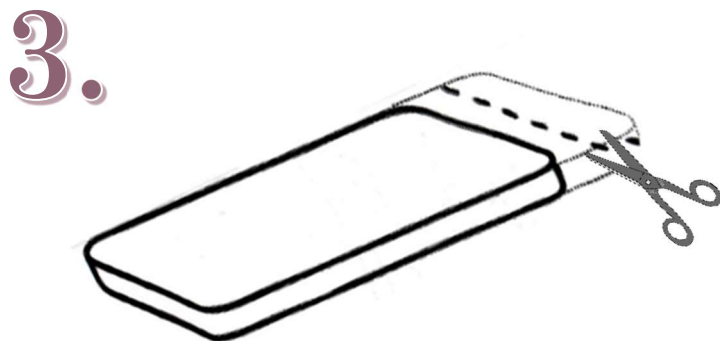

Remove this label.

Cut outer layer firm and pull sharply on the flap of polythene to break the seal allowing the mattress to unroll naturally.

Take care when pulling flap as mattress could unroll quickly.

You can now use a pair of scissors to cut the end of the bag and remove the mattress.

Please recycle according to your local guidelines

During the recovery process there will be fabric creasing in certain areas due to the mattress being in a rolled state. These creases will gradually fade away in time. This settling process is entirely normal and does not prevent immediate use, although complete recovery may take up to 72 hours.
