Swivel Bar Chair

ASSEMBLY INSTRUCTIONS

OE5-AT03

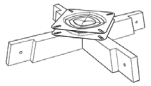

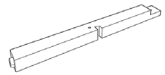

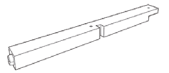

BEFORE ASSEMBLY:

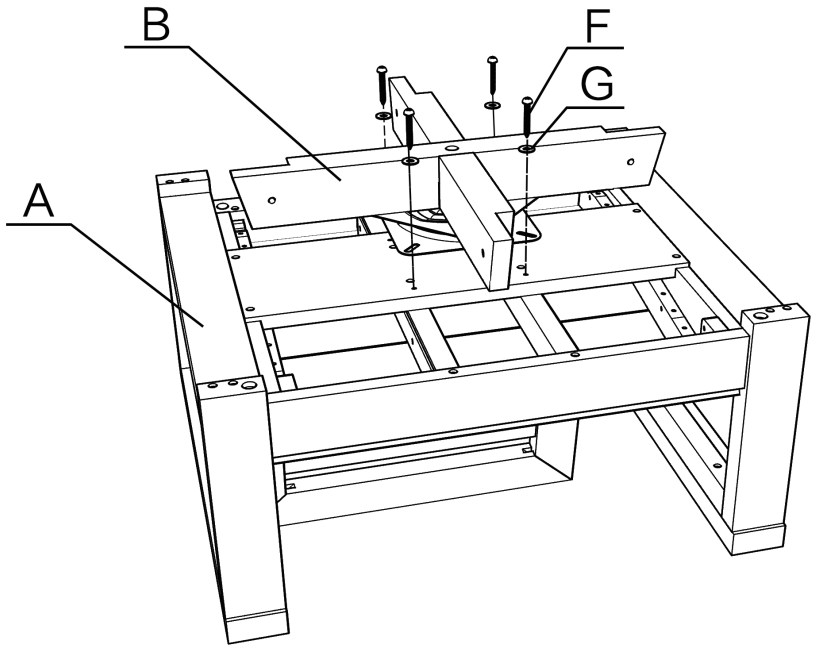

·Please read these instructions carefully before starting assembly. We suggest you carry out the assembly on a clean, flat surface to prevent scratches or dust adhesion.
·Keep children and pets away during assembly. This item contains small parts that may pose a choking hazard if swallowed.
·This product is designed for indoor/outdoor casual seating and is not intended for use as a toy, step ladder, or support structure. For residential use only. Commercial or public space use may void the warranty.
·HDPE is a molded resin material. Minor texture variations, color gradients, or slight surface dents or dips are inherent to the manufacturing process and will not affect structural integrity or performance.
·Although HDPE is weather-resistant, we recommend storing or covering the bar chair during extreme weather conditions such as hurricanes, heavy snow loads, or prolonged direct UV exposure in very hot climates to extend its lifespan.
·Do not use power tools to tighten bolts. Over-tightening may cause stress cracks or thread damage in the HDPE components.
·Clean with mild soap and water. Do not use abrasive cleaners, strong solvents, or high-pressure washers.
·Avoid contact with open flames or hot surfaces (e.g., fire pits, grills).
·Children under the age of 10 should be supervised when using or near the product.
·Do not discard packaging until assembly is complete. Retain these instructions for future reference or warranty claims.
·Product specifications and minor design improvements may occur without prior notice.

PARTS LIST:

Place all the parts on a clean and soft surface, identify all the parts and hardware kits against the parts list.
A portion of these parts are already attached to Part (B). Please identify them there during assembly.

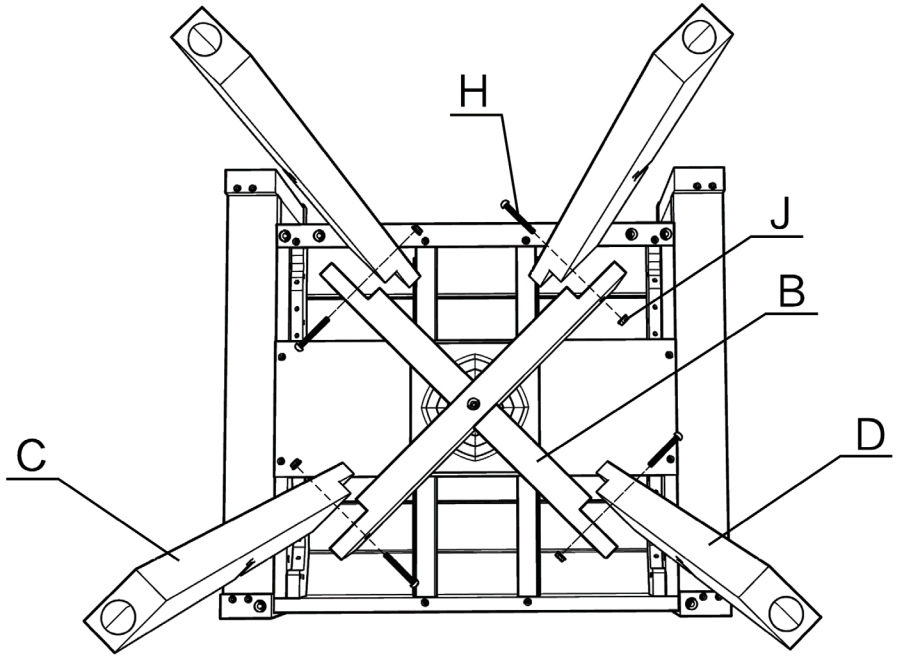

AX1  Seat	BX1  Turntable	CX2  Leg 1	DX2  Leg 2
EX4  Footrest	FX4  Screw(M6.3X40)	GX4  Washer	HX4  Bolt(M6X50)
IX4  Bolt(M6X80)	JX8  Flange Nut	KX1  Socket Tool	LX1  Allen Wrench

Step 1: Place all parts on a clean, soft surface. Identify all parts and hardware kits using the parts list. Then, turn over the Seat (A). Connect the Turntable (B) to the Seat (A) with Hardware (G, F) in the order shown in Fig(1).

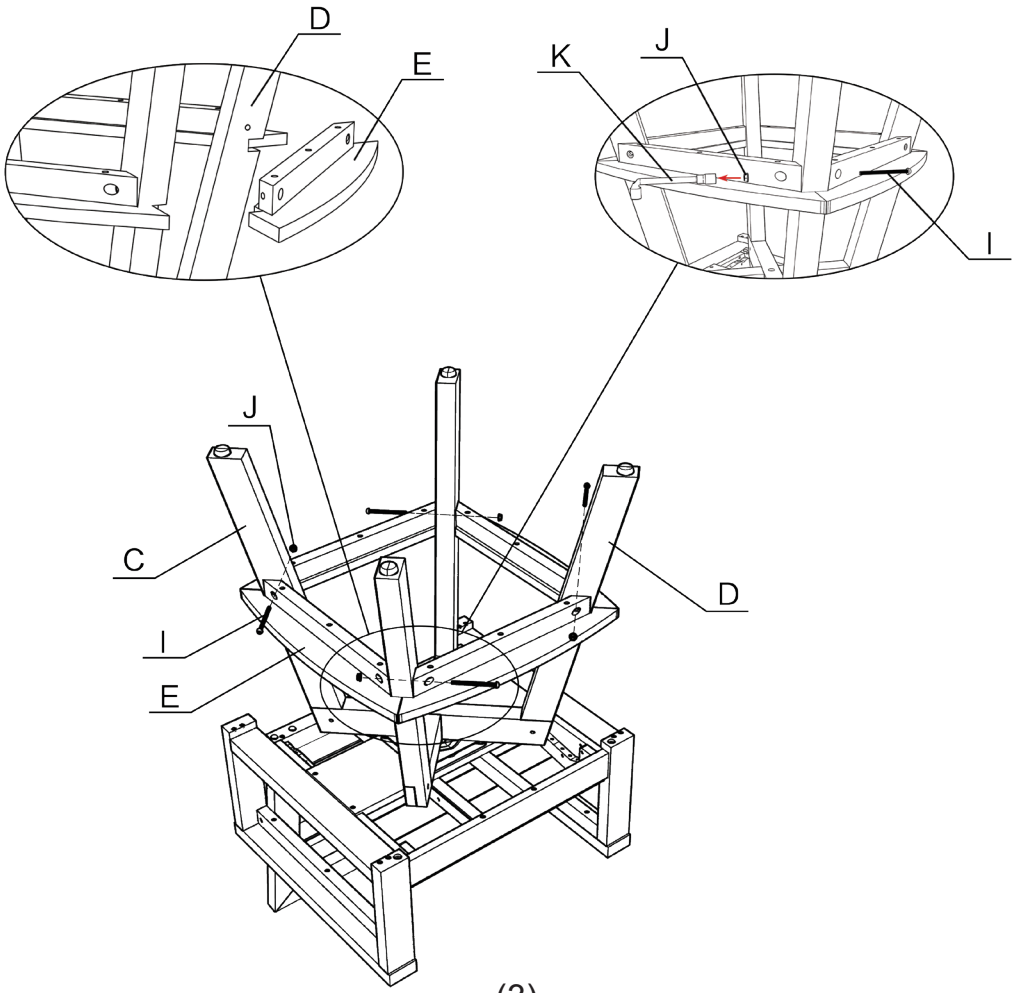

(1)

Step 2: Note that slots are pre-cut on Parts (C) and (D). These slots are designed for mounting the footrest. During installation, ensure the open ends of the slots face the outer side of the chair. Connect Parts (B, A) to Parts (C, D) with Hardware (J, H) in the order shown in Fig(2). Assemble them until an initial connection is established. Then, tighten all bolts with the Socket Tool (K) and Allen Wrench (L). Do not over-tighten bolts and nuts, as this may damage the chair and void the warranty.

(2)

Step 3: Install the Footrest (E) between the Legs (C, D) in the order shown in Fig(3). For best results, first insert a Flange Nut (J) into the Socket Tool (K) as demonstrated. This allows for easier installation. Finally, once all parts are aligned and connected, fully tighten all hardware. Do not over-tighten bolts and nuts, as this may damage the chair and void the warranty.

(3)

Step 4: Then, turn the chair upright and adjust the Adjustable Scratch-Resistant Foot Pads on the chair legs. Check and ensure that your swivel bar chair is stable. Now your chair should be ready for use.
