1

L*3

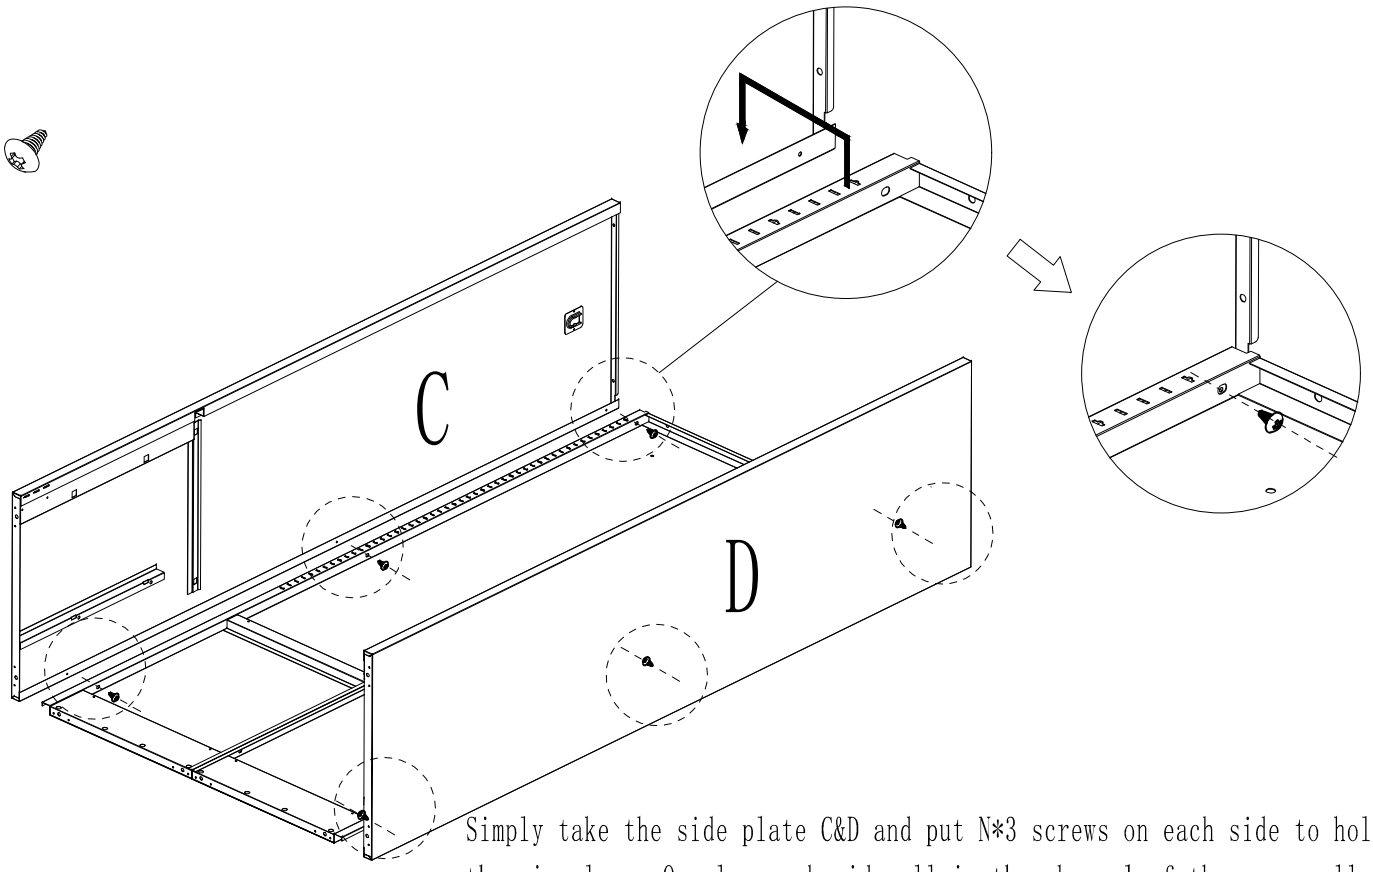

Let's start with the back of the cabinet.Take the back panel pieces A & B。Put the two rear walls together and put three bolts and nuts to hold them in place. (like shown in the picture)

2

N*6

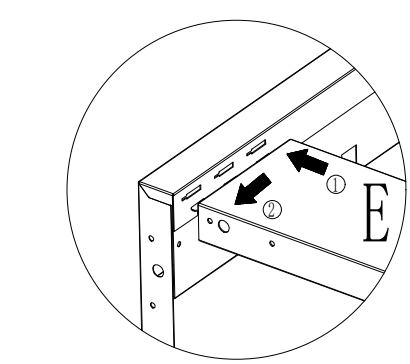

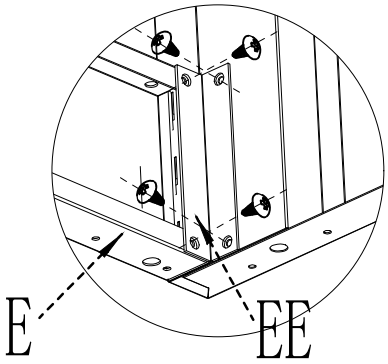

Simply take the side plate C&D and put N*3 screws on each side to hold them in place. Overlap each sidewall in the channel of the rear wall and put three screws on each side to hold them in place. Note that Part C is on the left side and Part D is on the right side.
If they are misplaced, it will affect the assembly.

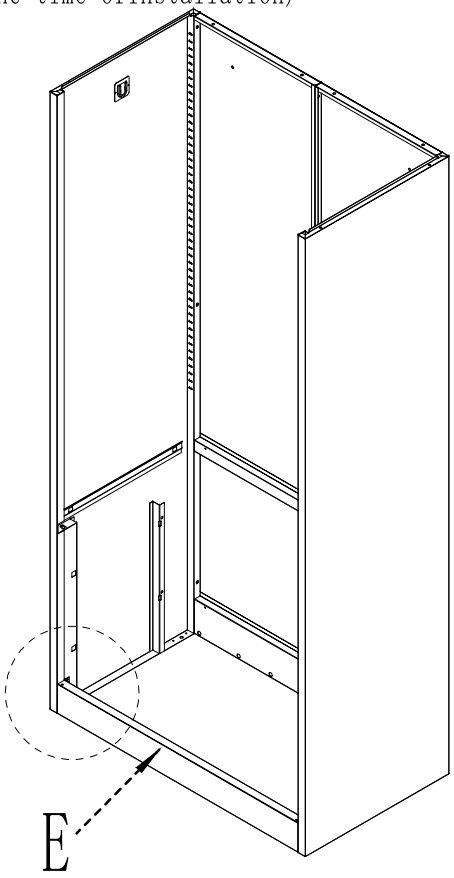

3

N*8

Snap the three buckles on either side of Part E into thethree holes in both side panels and then push itdown .Install the E*2 part with N*4 screw as shown in thepicture, and this EE is installed on the inside of the E part(Note* The screw is installed from the inside at the time ofinstallation)

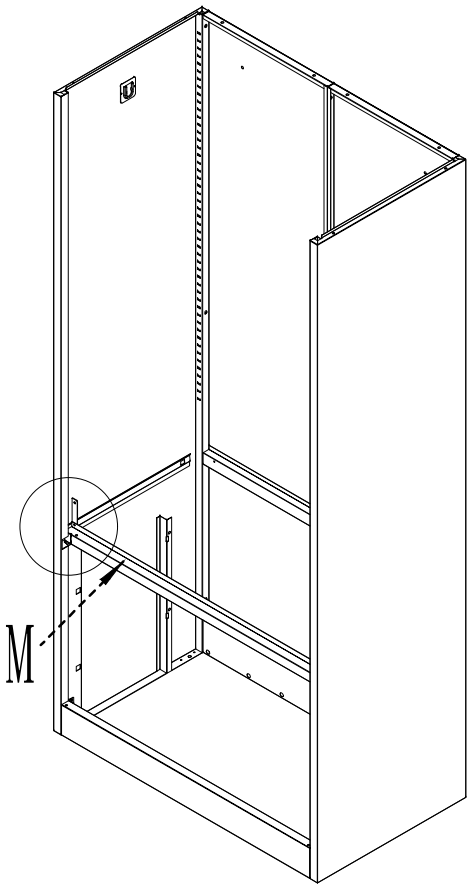

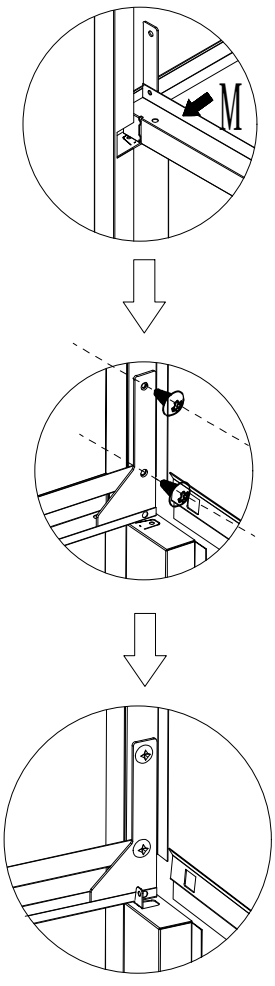

4

N*4

Install the fixing rod M and fix the N*4 screws on the back of the rod.

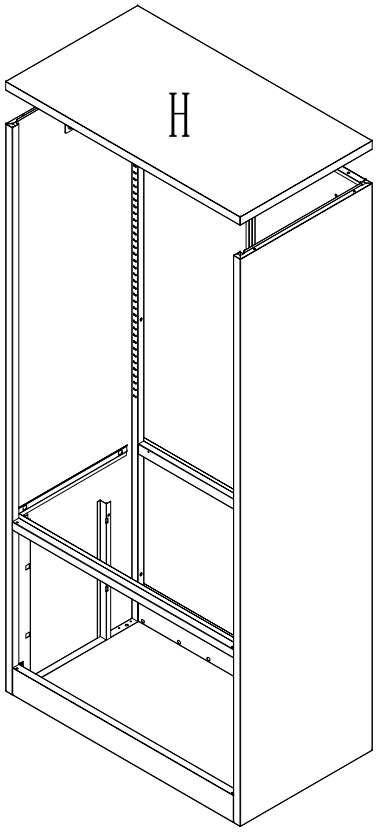

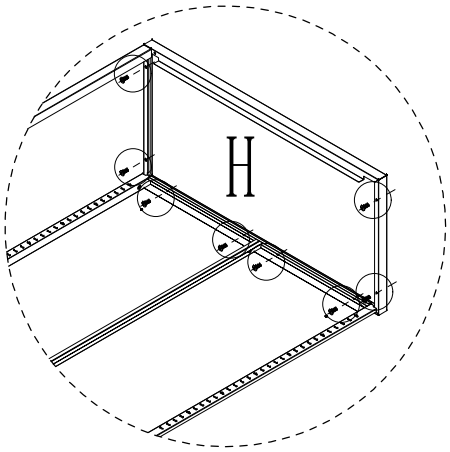

5

RR*8

Take Top Frame H*1, Fasten in place using RR*8 screws through the holes in each corner. Insert it through cabinet ,Push it until well fixed.

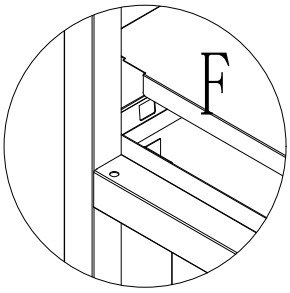

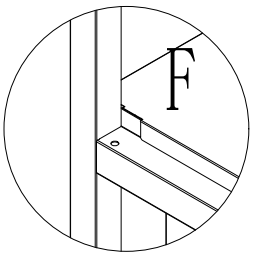

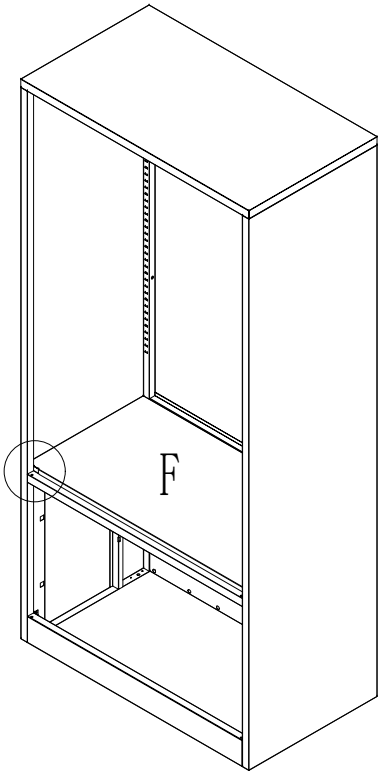

6

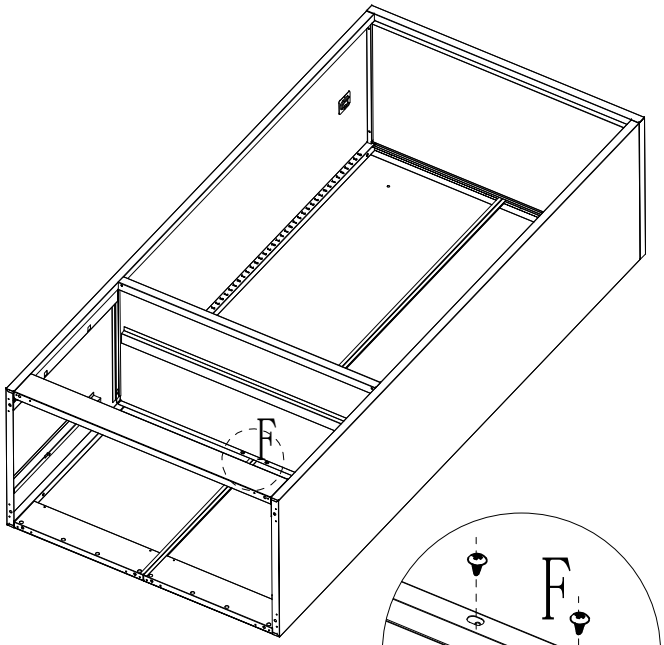

N*2

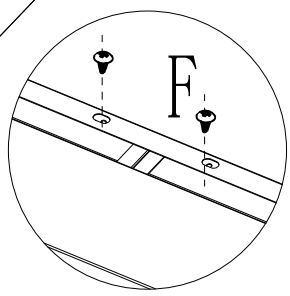

When placing Part F, place the notched side facing forward.
Install the set screws from middle of the bottom by using N*2.

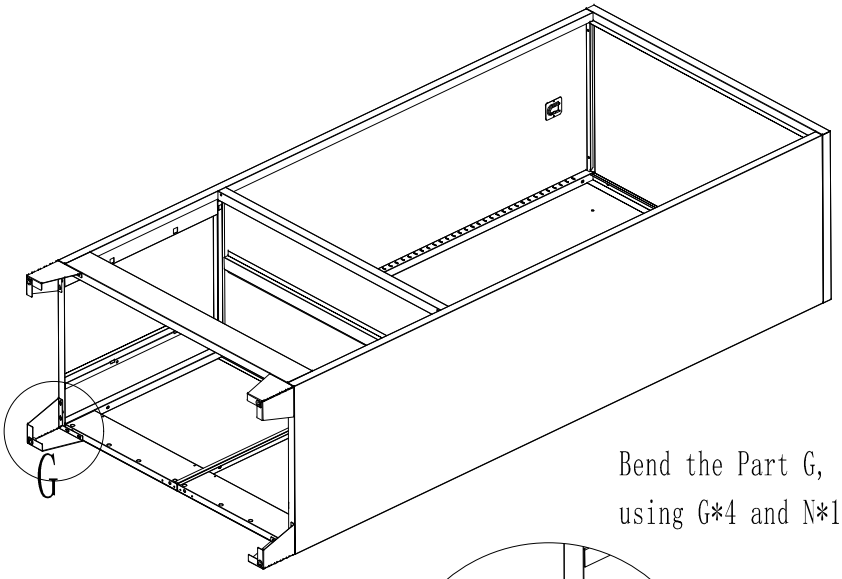

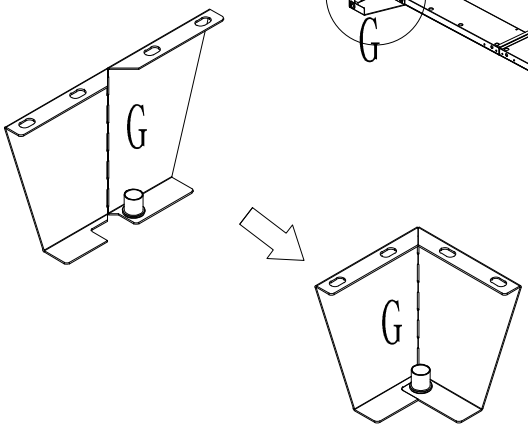

7

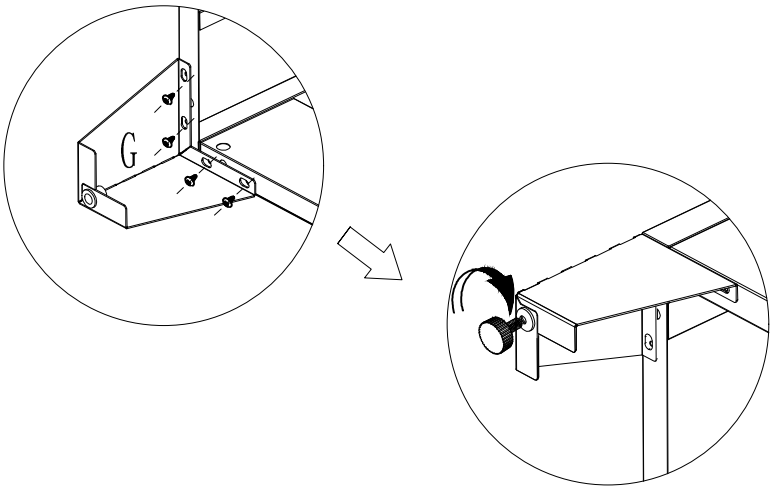

N*16

G*4

Bend the Part G, install the 4 legs by using G*4 and N*16

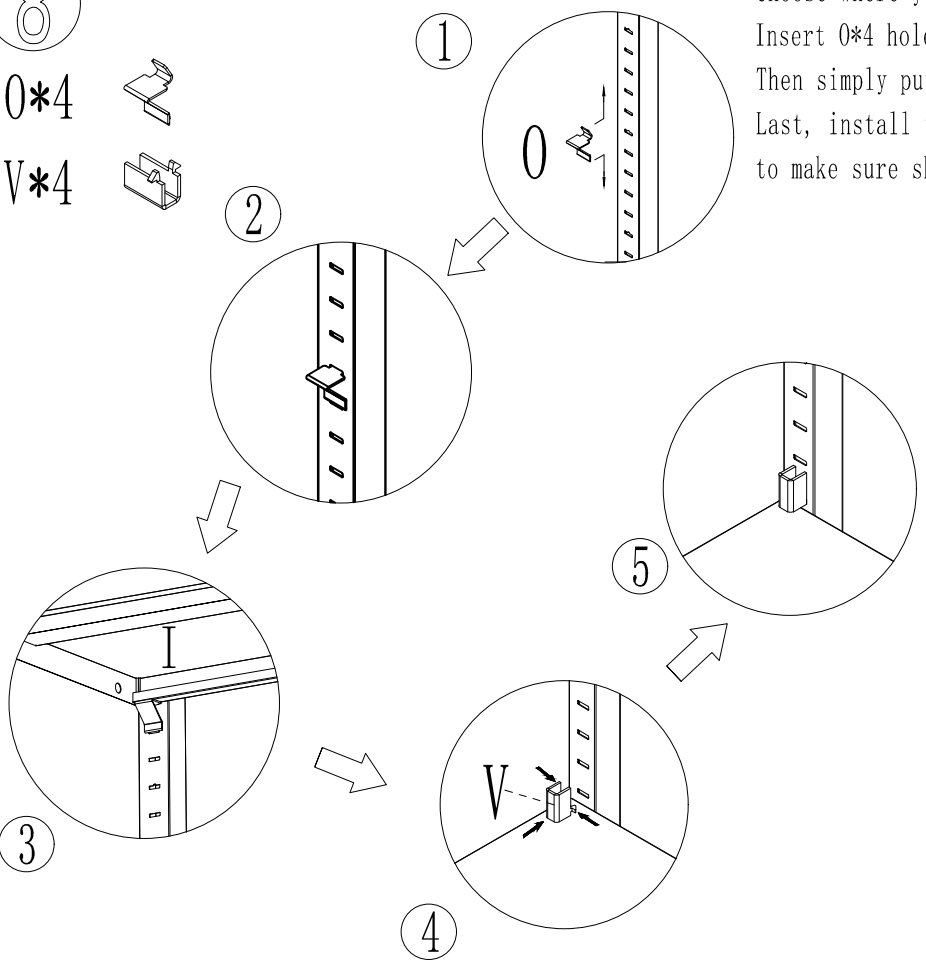

If you think it looks better without the standing corner, you can choose to skip this step (7)

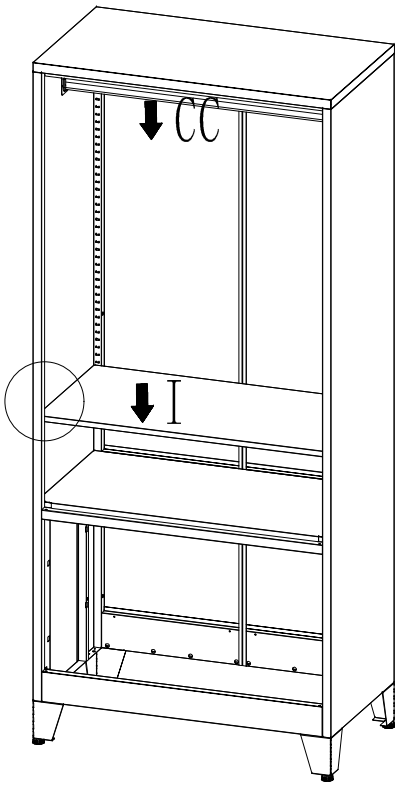

8

O*4

V*4

Choose where you want to mount the shelf .
Insert O*4 holders in the frame's holes, 1 for each corner.
Then simply put the shelf I to where you needed.
Last, install the plastic grid V*4 on the top of the shelf to make sure shelf securely.

9

S*2

Take S*2 bolt screws & insert a metal ring on it.

Insert the bolt in the bottom frame’s hole (like shown in the picture below).

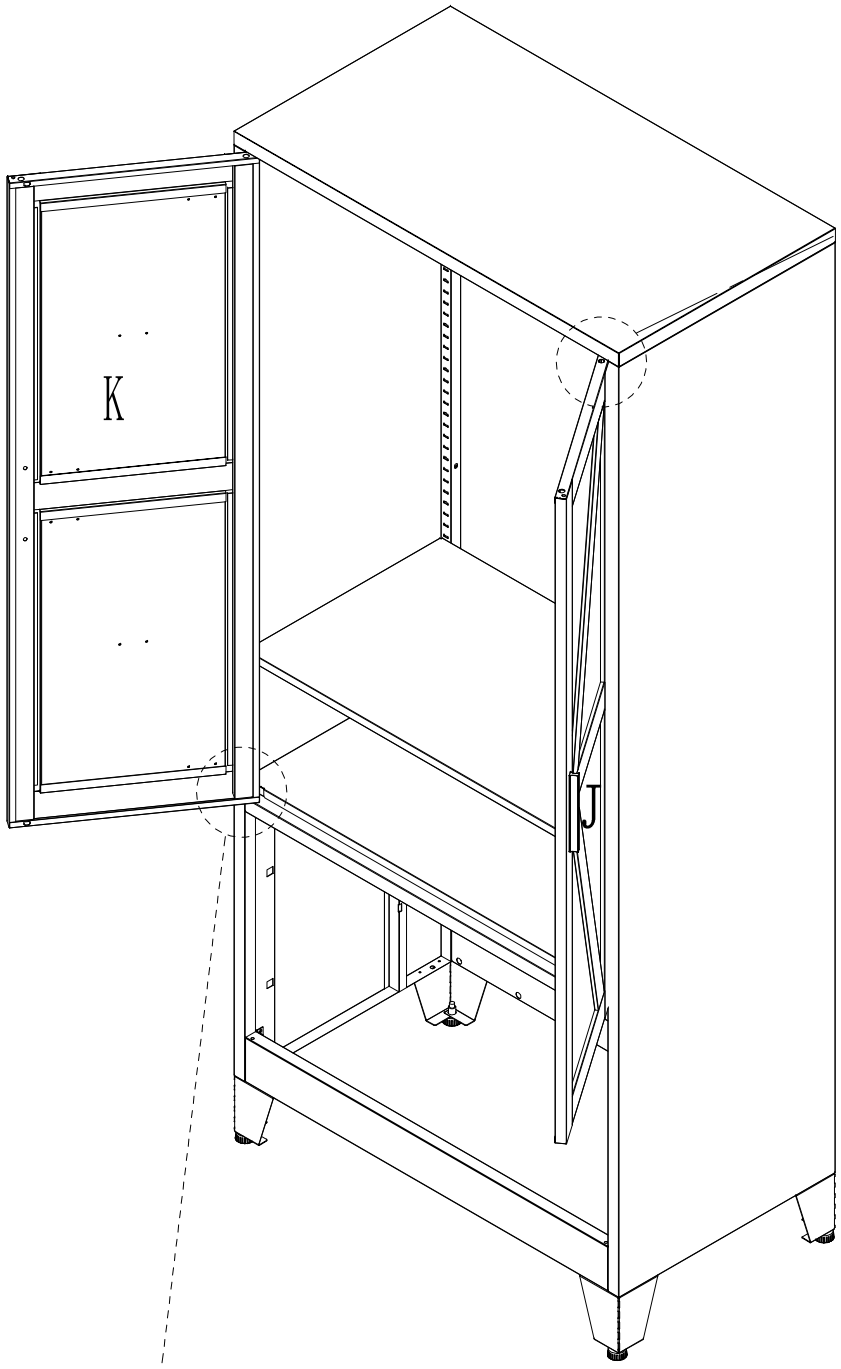

Take door K1 & J1.

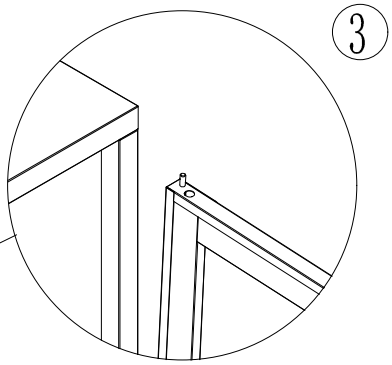

Place the door with the bottom hole in the bolt.

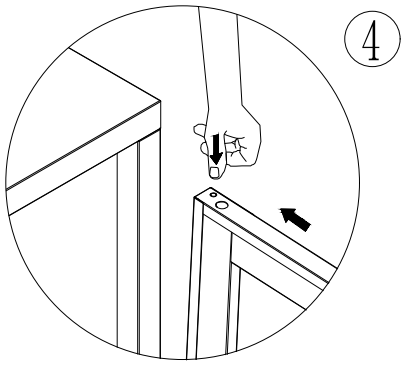

Press the arch at top of the door to fix the door in the upper frame.

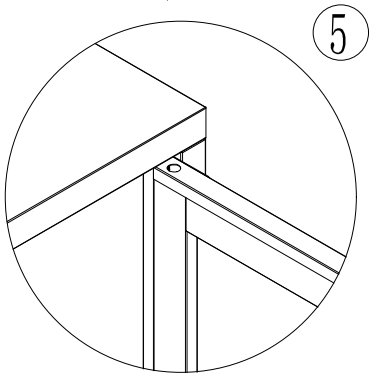

Make sure it is securely fastened up and down .

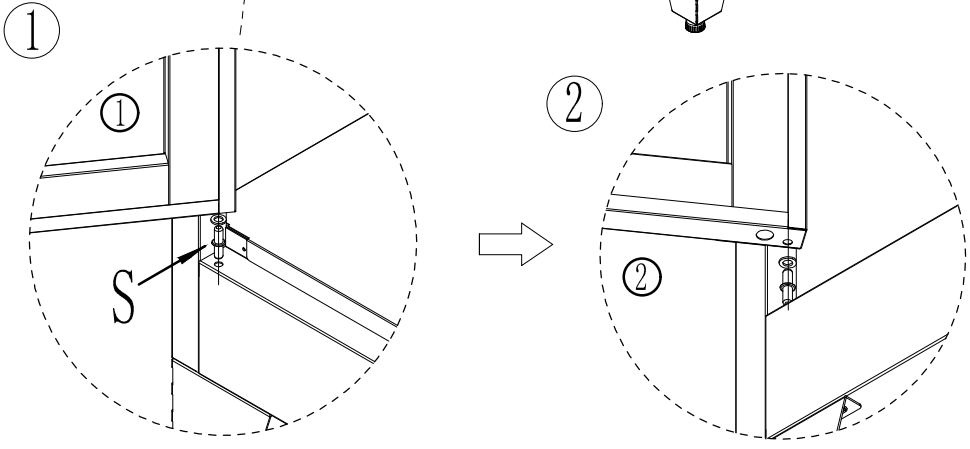

Move the door back & forth to test it .

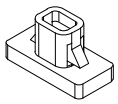

10

Q*4

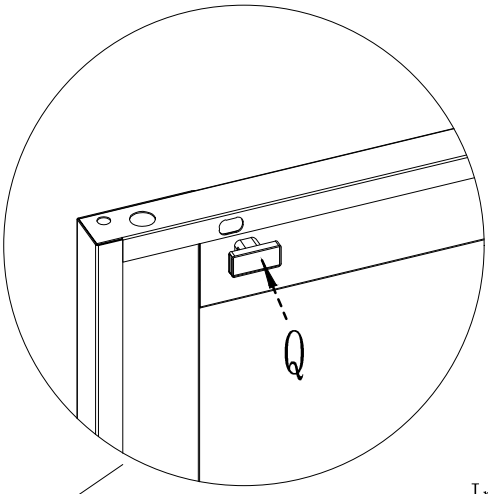

T*2

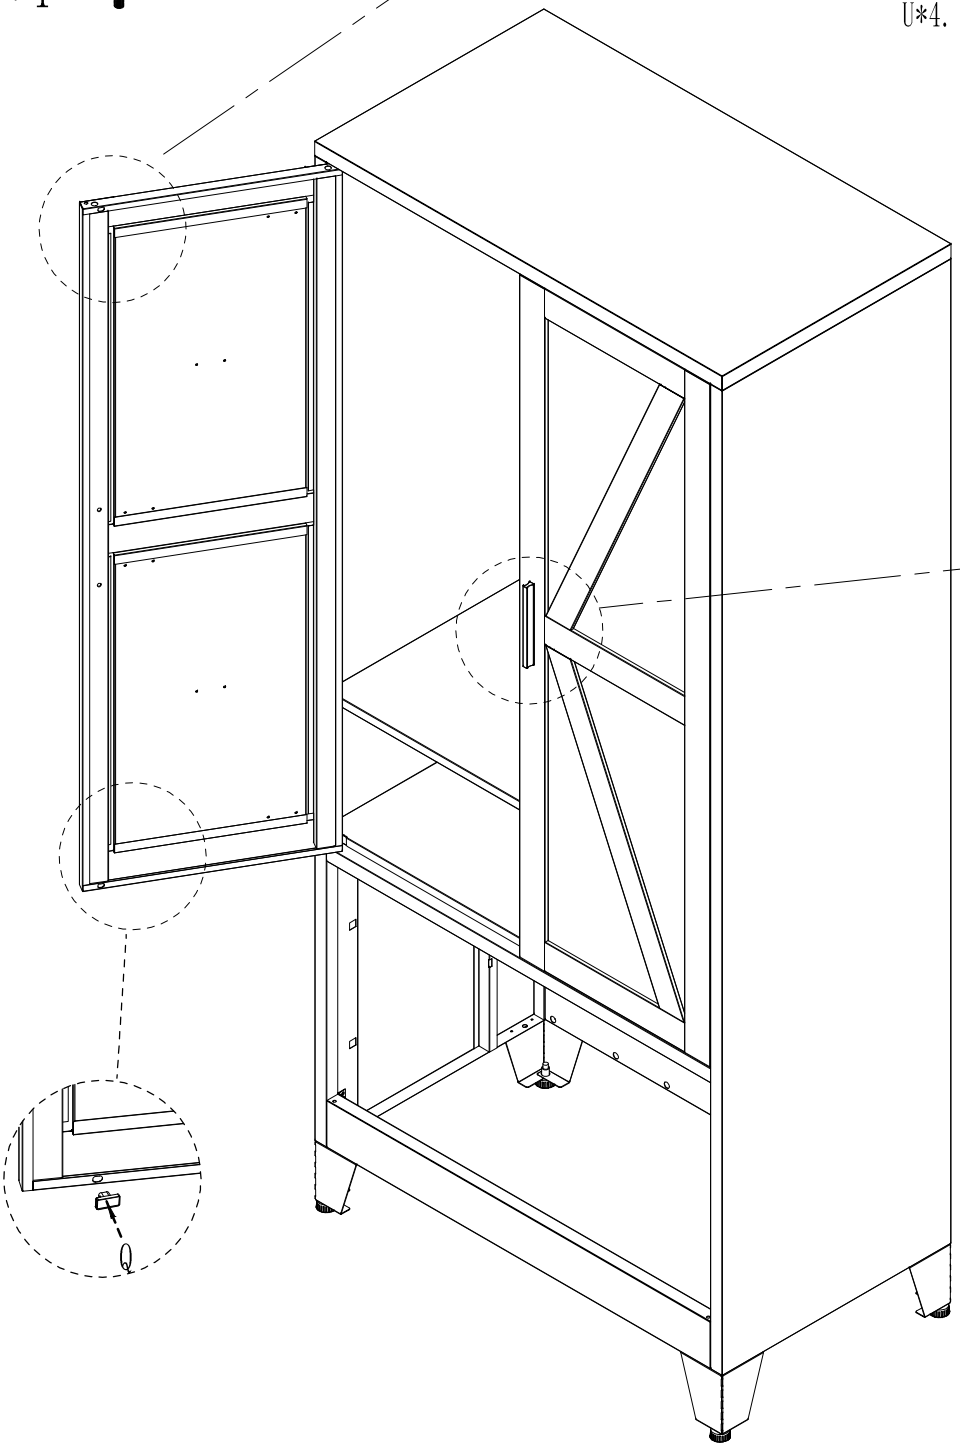

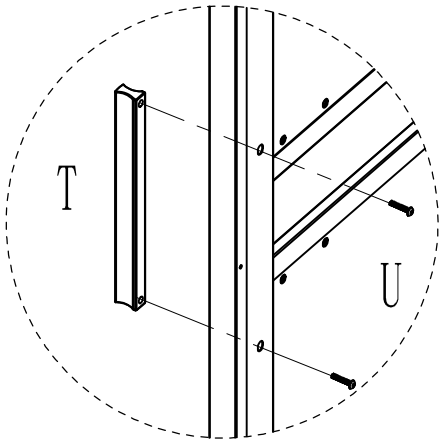

U*4

Install the Q *4 magnetic pieces
Last, Install the door handle T*2 by using U*4.

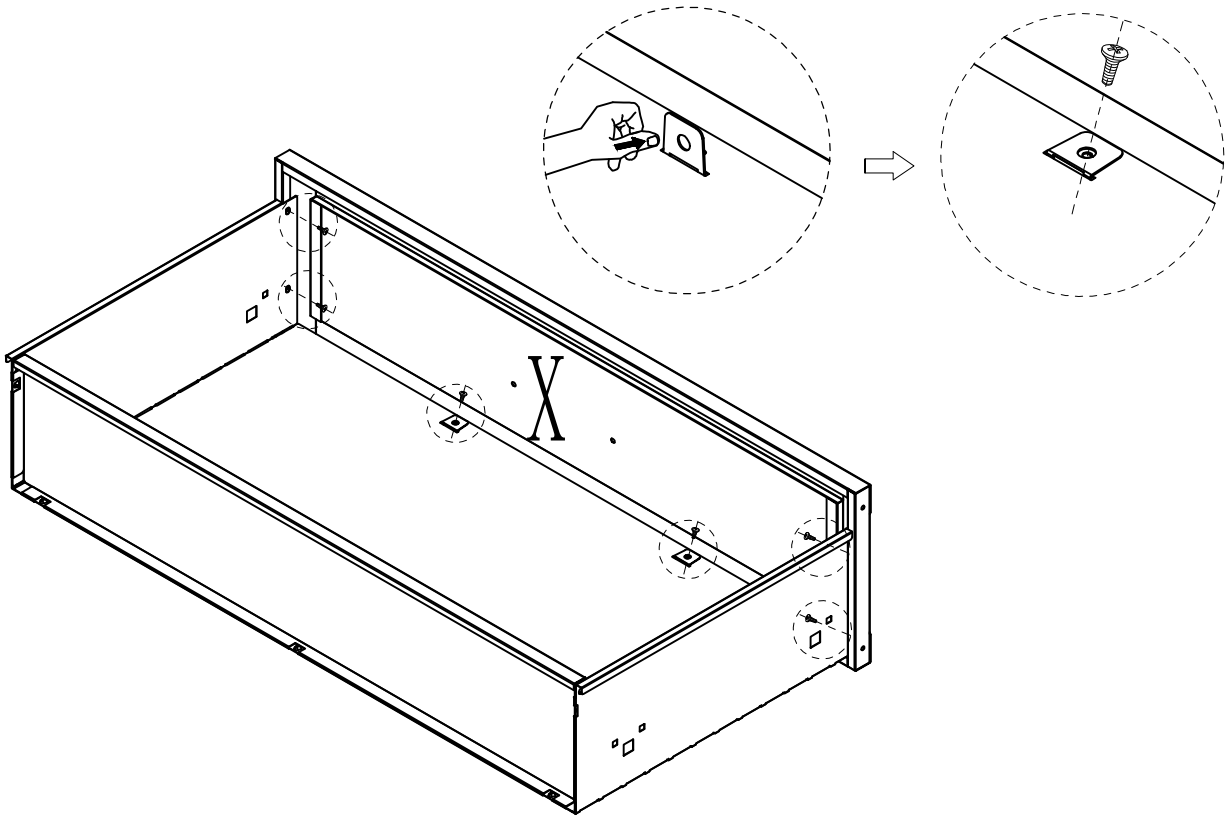

13

N*12

Install the parts X by using 6*N screws.

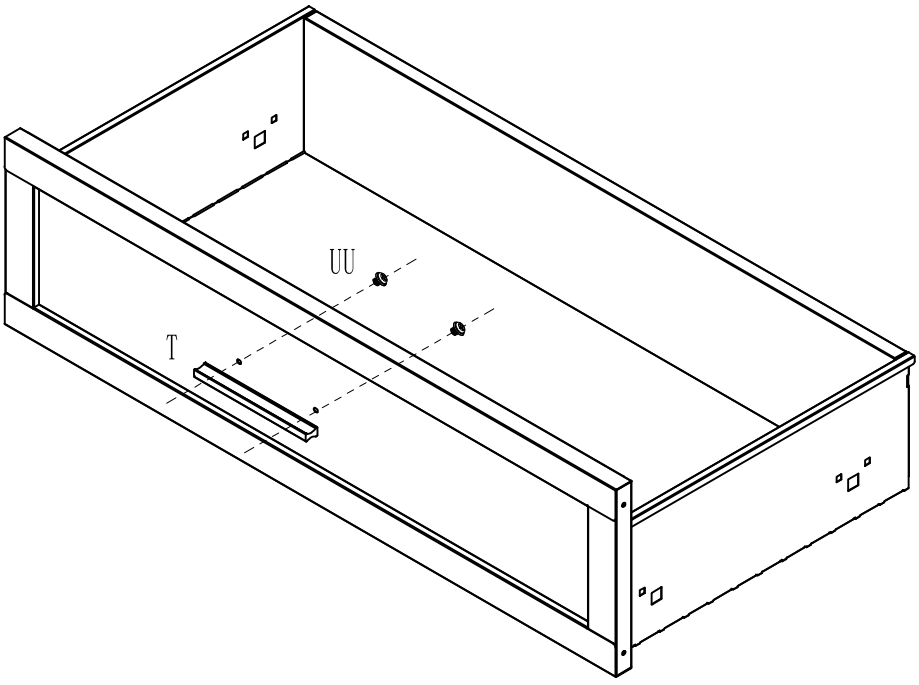

14

UU*4

T*2

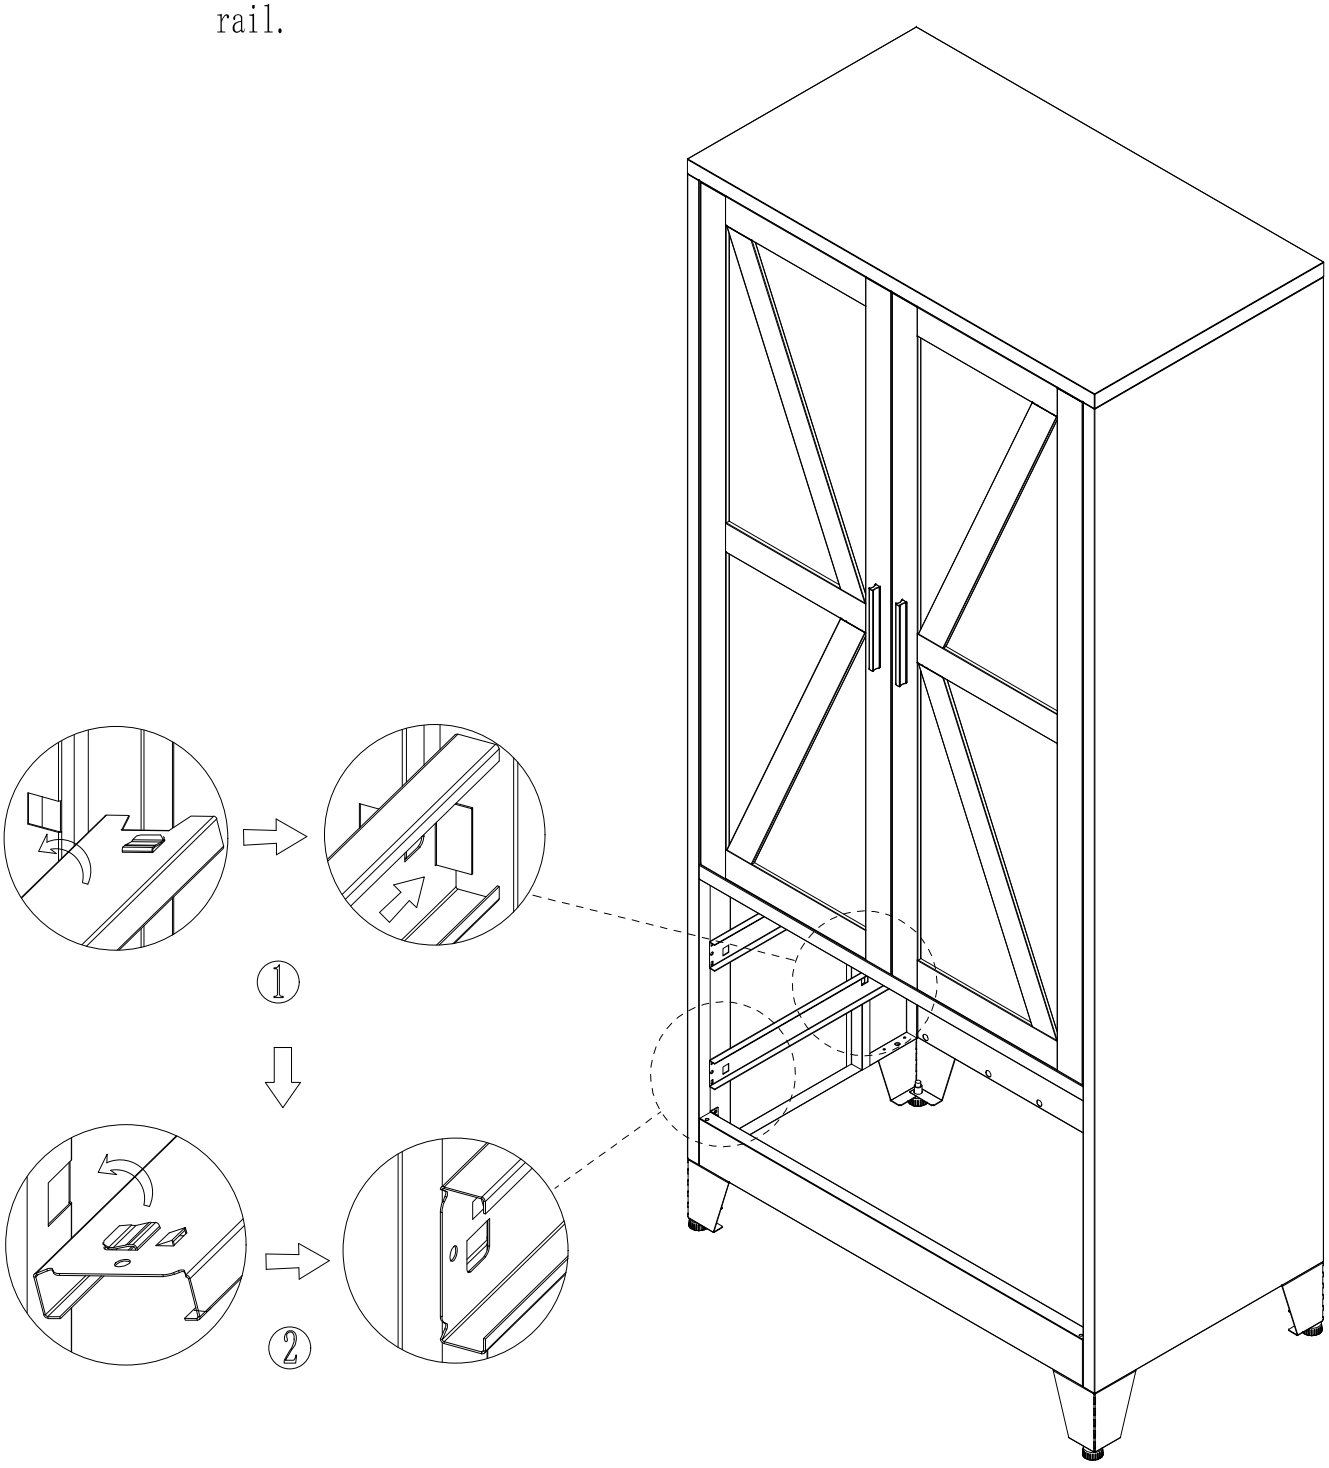

Install the drawers handle 1*T by using 2*UU screws.

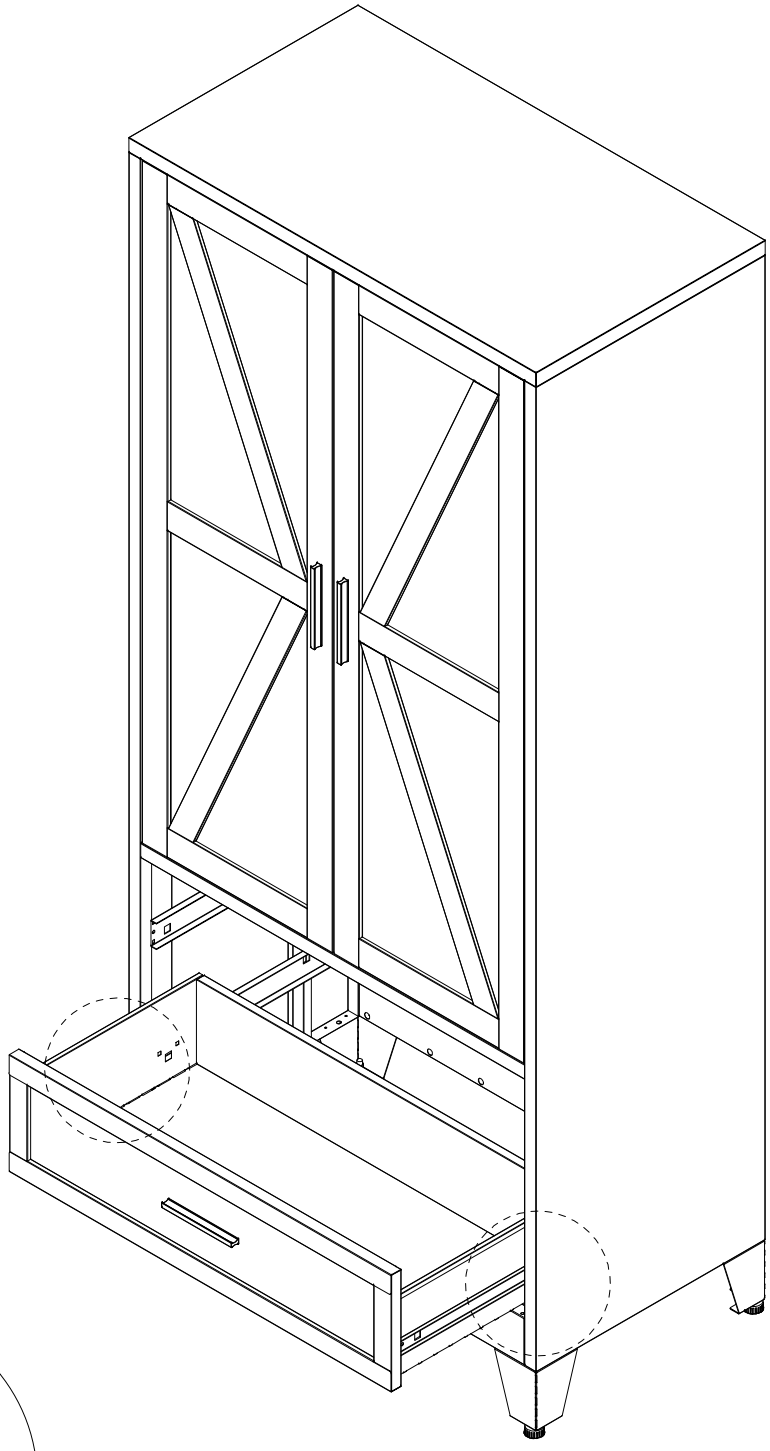

17

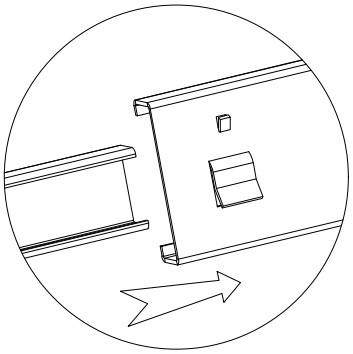

Install the cabinet side of the slide, you will see there is rectangular hole on the said of the drawer, then install metal side of slide onto both said of the cabinet.

Same process to finish the 4 life rail and 4 right rail.

18

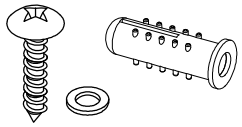

Pull the inner rails out, then insert the rail into glide,push down.(show in the picture).

19

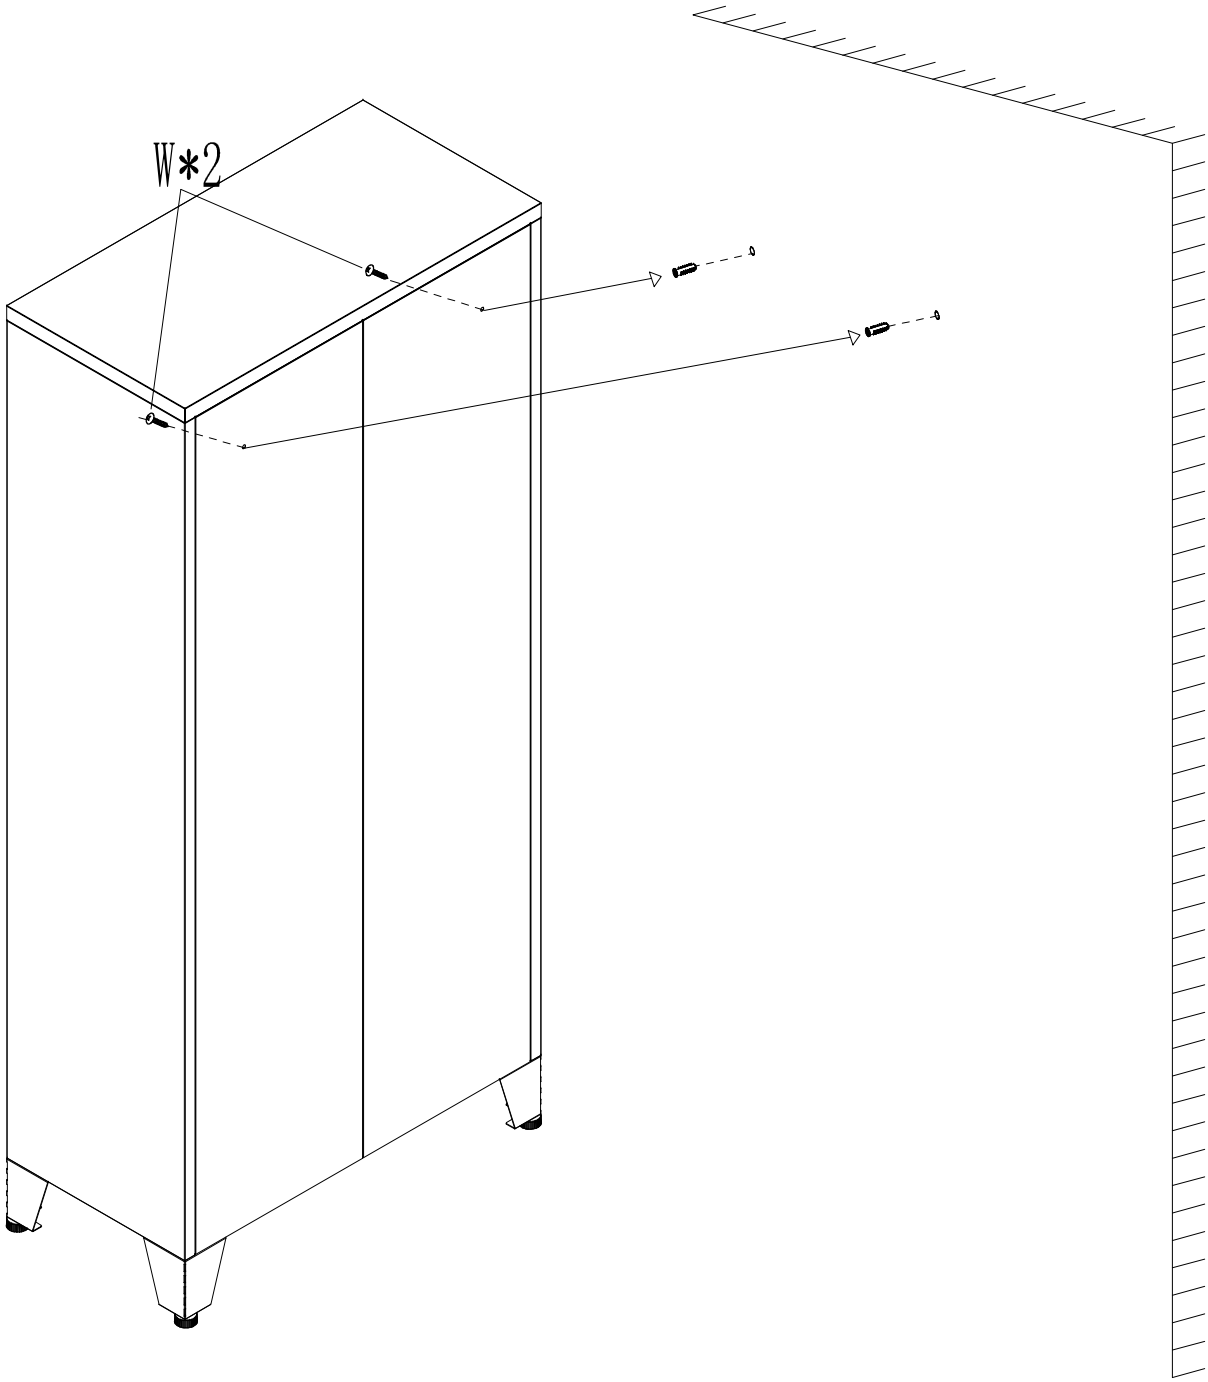

W*2

Push the metal cabinet against the wall.Mark the places on the wall there you are going to drill. Take the Percussion Drill. Drill holes in the marked places.

Take wall plugs W*2 insert in the drilled holes using a hammer.

(Serious or fatal crushing injuries can occur from furniture tip-over.To prevent this furniture from tipping over it mush be permanently fixed to the wall.)

Your metal cabinet is ready to use!

THANK YOU FOR BEING PART OF OUR STORY.
