 <p>For the convenience of installation, it is recommended to assemble these in advance, and then install the overall part from bottom to top.</p>				<p>Attention: To protect the durability of the wood and product, the surface of the solid wood of the product is coated with natural wood wax oil which is environmentally friendly, non-toxic, and odorless, and disposable gloves can be worn during installation.</p>		

I: Litter Box Installation

1. Use model (a) screws to screw into all white screw holes on the mode
2. Insert the type (G,H) plate into the (a) screws according to the positional relationship in the picture, first into the lower part of the insertion, and then align the upper part.
3. Check the screws aligned with the holes, the left and right sides of the uniform force at the same time to press, so that it is firm and no gaps. If the force is small, you need to pad thick cardboard on the board and then use the tool to tap.

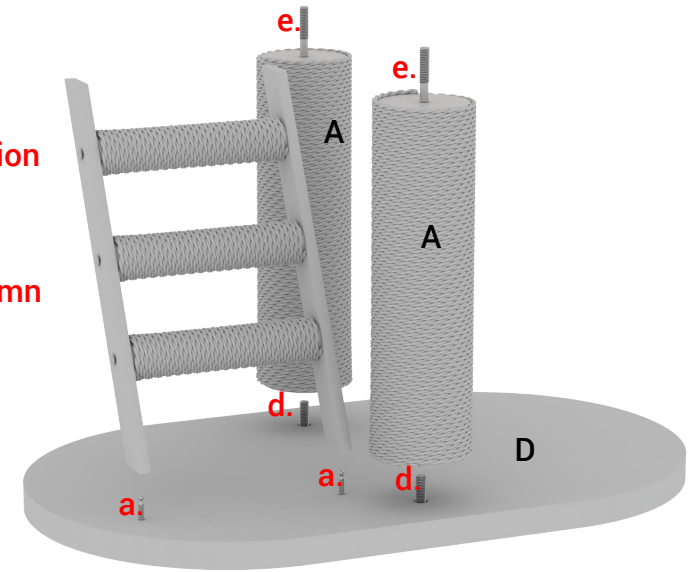

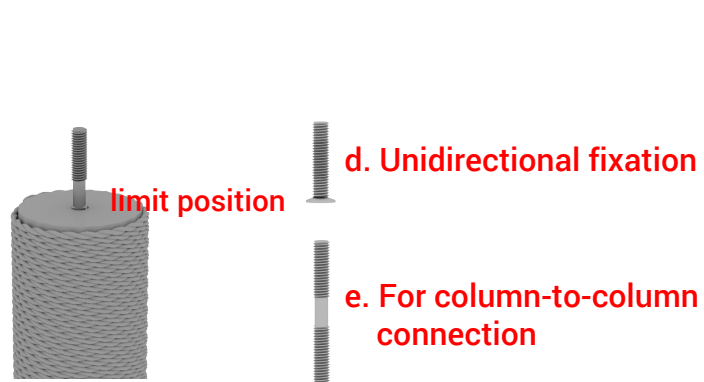

II: Installing the ladder

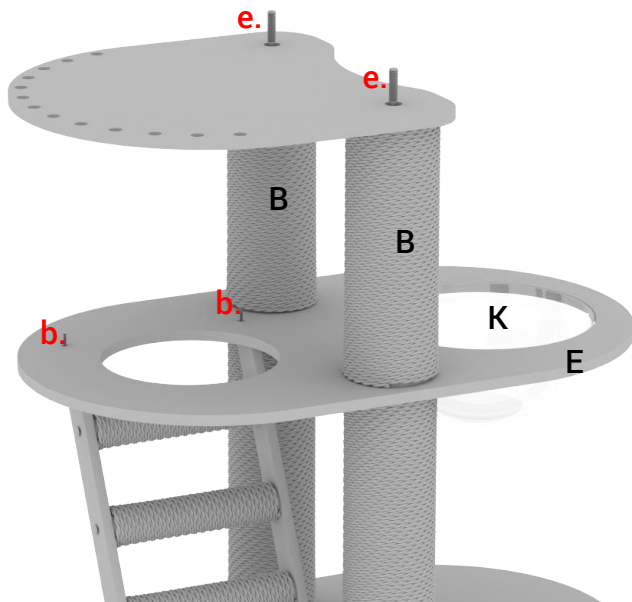

1: Install the ladder on both sides of all with type (c) screws.

2: Note that the openings at both ends of the ladder are different and need to be oriented in a uniform way.

III: Bottom Mount

IV : Middle Mount

V : Top Mount

Installation of fences

1: Squeeze an appropriate amount of glue into the hole in the board and then insert the small posts.

2: Squeeze an appropriate amount of glue from left to right onto the fence hole and align it carefully. After calibration, slowly press it in.
