

Diatomaceous Earth Bath Mat

Non-Slip

Fast Absorption

Quick Drying

100% Natural

Non-Toxic

Antibacterial

Size: 60 x 30 cm | 23.6 x 15.3 in

Badeloft[®]

Composition: 60% Diatomaceous earth, 30% Stone Minerals, 10% Fibers

User Guide

Before Use: Rinse off any residual powder from the surface of the mat with water. Allow it to air dry in a well-ventilated, dry place.

Natural Material Variations: This product is made from natural diatomaceous earth, so the surface may have small imperfections such as powder residue, color spots, or minor scratches. These are normal and do not affect the functionality of the product.

Initial Odor: The mat may have a slight odor when first used, but this will dissipate over time.

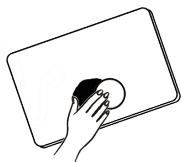

Usage Environment: For best results, use the mat in a well-ventilated area. Do not expose it to direct sunlight or use heat sources to dry it.

Avoid Staining: Do not use colored liquids on the mat, as they may leave permanent stains that cannot be cleaned off.

Cleaning: Dust and hair can be easily removed by rinsing the mat with water. After cleaning, place the footpad in a cool, ventilated area to air dry.

Restoring Water Absorption: Over time, the water absorption of the mat may decrease. If this happens, gently sand the surface with the included sandpaper to restore its original water-absorbing properties.

Advantages of Diatomaceous Earth Mats: Diatomaceous earth mats are firmer than traditional mats, offering superior water absorption and quick drying. They are resistant to odors and bacteria buildup, making them ideal for long-term use.

Remove Stubborn Stains with included sandpaper

Applications for use
