## ASSEMBLY AND INSTALLATION INSTRUCTIONS

### Rack Assembly

- 1) Remove one of the 3/8" x 1" button head screws from one side of the front of the rack. Place one of the arms in front of the hole and using the button head screw, attach the arm to the front of the rack carefully screwing through the steel of the end of the rack and into the wood. Repeat on the other side.
- 2) We recommend that you anchor your rack into the solid wood of wall studs. Carefully measure the area where the rack is to be hung and install the lag screw directly into the wood studs. If it is not convenient to hang your rack directly into the wood you may use the included DRYWALL anchors included in the toggle pack enclosed with your rack. See Toggler® brand manufacturer recommendations for weight limits included in the instructions in the Toggle kit.
- 3) After the rack has been mounted onto the wall, place the glass holder inside the rectangle so that it hooks over the ends of the rack. Place the grid brackets perpendicular to the rack inserting into the pre-existing holes and placing the other end over the back of the rack. Place the wine bottle holder on the grid brackets.

**WARNING:** It is important that your fireplace tool stand is assembled correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
