- Convenient And Practical
- Lightweight And Portable

## Specification

- Shipping Limitations:Unlimited
- Available Ship to:United States

## Details

### Introductions:

The materials we use are different from the general plastic products on the market. This product is made of high-quality plastic plate, which will be more durable. Our shoeboxes are all flat packed, so when you get them, you just need to fold them up and put them together; when you don't use them, you can dismantle them and put them flat without taking up any space. The size of the shoe box is enough for men's or women's shoes. One on one box. These boxes have a completely transparent door for easy access to the contents. You can take out your shoes without taking the box out of the pile. The plastic material used in the shoe box is also easy to clean. Easy to assemble or disassemble. In addition, the plastic sheet will keep its shape and do not need to be thrown away because of bending problems. The special design makes the stacking easier to deform.

### Features:

1. Door frame integrated
2. Clamshell design
3. Convenient And Practical
4. Lightweight And Portable

### Specifications:

1. Frame Material: PS
2. Color: White
4. One Piece Dimension: (13.4 x 9.1 x 5.5)" / (34.04 x 23.11 x 13.97)cm (L x W x H)

### Package Includes:

12 x Plastic Cart
