

# THE CROZET

Bathroom Collections

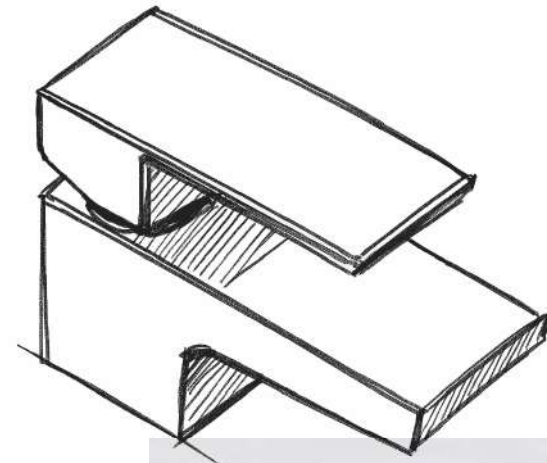

CROZET is built on the clarity of architecture—thin profiles, clean cuts and defined geometries. Its inspiration comes from the urban built environment: structured facades, right angles, and controlled proportions.

There is no ornament, only intention. Every line in CROZET serves function, every edge defines structure. It speaks the language of minimal design—quiet, efficient, and composed.

# Minimal Structure. Maximum Discipline.

CROZET is defined by ultra-thin profiles, strict geometries, and refined volumes. Every line is precise, every transition clean. This is minimalism with intent—a system that aligns with the grid, frames space, and integrates effortlessly into its architectural context.

With rational detailing and a visually neutral presence, CROZET is designed to adapt across a wide range of interior programs. Its simplicity makes it easy to specify, while its geometric consistency ensures cohesion in both compact and large-scale spaces. It is a system built for clarity—versatile, restrained, and ready to integrate.

CROZET is where form becomes infrastructure. It is a tool for architects and builders who value restraint over decoration, and structure over display. It doesn't demand attention—it enables clarity.
