

USPS REGULATIONS FOR MAILBOX INSTALLATION:

- Installation methods are determined by your type of mailbox post.
- If this mailbox is replacing an old mailbox on an existing post – install the same way the old box was installed – using the same screws/brackets that held the old mailbox.
- If this mailbox is being installed on a new post – see the instructions included with your post for directions on installation. Hardware should be included with your new post.

Thank you for being a Postal Pro customer!
